Lymphocytes Sarah L. Rowland-Jones,Andrew J. McMichael,2000 Cellular immunology is a rapidly moving field in which recent advances have made significant contributions to our understanding of the immune response to infection and malignancy These in turn have given rise to new therapeutic opportunities in areas such as vaccines and immunotherapy Many investigators have been discouraged by the complicated protocols involved in cellular immunological studies as illustrated by the meticulous care required for the generation of antigen specific T cells Lymphocytes A Practical Approach second edition contains straight forward protocols for well established procedures in the study of lymphocytes including preparation and identification of lymphocytes immortalization cell and organ culture and quantification assays It also covers the recent technological advances which have revolutionised the field such as the use of the Interferon gamma ELISpot assay and peptide HLA tetrameric assays to quantify antigen specific T cells directly from peripheral blood without the need for in vitro culture and molecular methods for accurate HLA typing **Orthopaedic Imaging: A Practical Approach** Adam Greenspan,Javier Beltran,2020-04-07 Trusted by both radiologists and orthopaedic surgeons for authoritative comprehensive guidance on the interpretation of musculoskeletal images Orthopaedic Imaging A Practical Approach is an ideal resource at every stage of training and practice The fully revised seventh edition retains the large images easy to read writing style and careful blend of illustrations and text that clearly depict all relevant imaging modalities and all pathological entities

Macrophages ,2000-09-14 Macrophages are an important part of the immune response and are characterized by their ability to phagocytose foreign matter However the difficulties involved in macrophage isolation mean they are some of the body's least explored cells Macrophage Methodology describes how to isolate moderate to high yields of viable cells from a variety of specific tissue sites under both normal and pathological conditions and then goes on to give protocols for

macrophage purification The third chapter covers techniques used to identify and measure endocytic and phagocytic capabilities using immunochemistry and fluorescent analysis Chapter four identifies the key issues relating to the study of macrophages as antigen presenting cells and has protocols for the major assays used to measure antigen processing and presentation Also covered are the theoretical and practical issues related to the processing and presentation of intracellular pathogens for which macrophages are the major host cell The methods described for measuring macrophage secretory products concentrate on bioassays for molecules where no ELISA is available The next two chapters cover measuring macrophage activity in vitro and in vivo Finally methods are described for the analysis of gene expression in macrophages A variety of broad techniques have been brought together in one affordable volume to make Macrophage Methodology an essential buy for anyone studying macrophages

Epitope Mapping Olwyn M. R. Westwood, Frank C. Hay, 2001 Epitope Mapping covers all the major methods for the identification and definition of epitopes This book is intended for researchers in academia and industry involved with epitope mapping

Monoclonal Antibodies Philip Shepherd, Christopher J. Dean, 2000 Monoclonal Antibodies A Practical Approach covers the preparation testing derivation and applications of monoclonal antibodies New immunological techniques incorporating tried and tested methodologies are described making the book of interest to established and inexperienced immunologists Both the standard somatic hybridization technique and recombinant techniques including the use of phage libraries for the preparation of rodent and human monoclonal antibodies are described Protocols for both the small and large scale production are detailed as well as purification and labelling with both radioisotopes and non radioisotopes methods The applications of monoclonal antibodies in immunoblotting enzyme linked immunoassays immunofluorescence and FACS analysis are all covered in detail Finally protocols are given for the use of monoclonal antibodies in rheumatoid arthritis tissue typing detecting DNA modified during chemotherapy and in the clinical analysis of transplantation samples for malignancy This book will therefore be an invaluable laboratory companion to anyone using monoclonal antibodies in their research
