Free Will and Epistemology Robert Lockie, 2018-01-11 In the first in depth study of the transcendental argument for decades Free Will and Epistemology defends a modern version of the famous transcendental argument for free will that we could not be justified in undermining a strong notion of free will as a strong notion of free will is required for any such process of undermining to be itself epistemically justified By arguing for a conception of internalism that goes back to the early days of the internalist externalist debates it draws on work by Richard Foley William Alston and Alvin Plantinga to explain the importance of epistemic deontology and its role in the transcendental argument It expands on the principle that ought implies can and presents a strong case for a form of self determination With references to cases in the neuroscientific and cognitive psychological literature Free Will and Epistemology provides an original contribution to work on epistemic justification and the free will debate

Freedom, Teleology, and Evil Stewart Goetz, 2011-10-27 In Freedom Teleology and Evil Stewart Goetz defends the existence of libertarian freedom of the will He argues that choices are essentially uncaused events with teleological explanations in the form of reasons or purposes Because choices are uncaused events with teleological explanations whenever agents choose they are free to choose otherwise Given this freedom to choose otherwise agents are morally responsible for how they choose Thus Goetz advocates and defends the principle of alternative possibilities which states that agents are morally responsible for a choice only if they are free to choose otherwise Finally given that agents have libertarian freedom Goetz contends that this freedom is integral to the construction of a theodicy which explains why God allows evil

Walters, 2020-03-10 Are humans free or are we determined by our genes and the world around us The question of freedom is not only one of philosophy's greatest conundrums but also one of the most fundamental questions of human existence It's particularly pressing in societies like ours where our core institutions of law ethics and religion are built around the belief in individual freedom Can one still affirm human freedom in an age of science And if free will doesn't exist does it make sense to act as though it does These are the issues that are presented probed and debated in the following chapters A dozen experts specialists in medicine psychology ethics theology and philosophy grapple with the multiple and often profound challenges presented by today's brain science After examining the arguments against traditional notions of free will several of the authors champion the idea of a chastened but robust free will for today one that allows us still to affirm the value of first person experience

The Obligation Dilemma Ishtiyaque Haji, 2019-08-07 Can you be morally obligated to do something To renowned philosopher Ishtiyaque Haji the answer is guardedly no Regardless of whether determinism is true he argues there is a prima facie plausibility that there are no moral obligations Powerfully and efficiently Haji develops a conclusion that has major implications for how we conceive issues in moral responsibility and free will The book develops the obligation dilemma as clearly as possible The next step will be for further sustained philosophical work to solve it assuming it can be resolved inspired by Haji In many respects the obligation dilemma mirrors the well known responsibility dilemma where no one is morally responsible for anything When suitably amended the strongest recommendations in favor of or in response to the responsibility dilemma neither fully support nor undermine the obligation dilemma Exposing the obligation dilemma's implications for responsibility and its ramifications for forgiveness something central to interpersonal relationships underscores its urgency
