New Communities United States. Housing and Home Finance Agency. Library, 1965 *America's Communal Utopias* Donald E. Pitzer, 2010-01-20 From the Shakers to the Branch Davidians America's communal utopians have captured the popular imagination Seventeen original essays here demonstrate the relevance of such groups to the mainstream of American social religious and economic life The contributors examine the beliefs and practices of the most prominent utopian communities founded before 1965 including the long overlooked Catholic monastic communities and Jewish agricultural colonies Also featured are the Ephrata Baptists Moravians Shakers Harmonists Hutterites Inspirationists of Amana Mormons Owenites Fourierists Icarians Janssonists Theosophists Cyrus Teed's Koreshans and Father Divine's Peace Mission Based on a new conceptual framework known as developmental communalism the book examines these utopian movements throughout the course of their development before during and after their communal period Each chapter includes a brief chronology giving basic information about the group discussed An appendix presents the most complete list of American utopian communities ever published The contributors are Jonathan G Andelson Karl J R Arndt Pearl W Bartelt Priscilla J Brewer Donald F Durnbaugh Lawrence Foster Carl J Guarneri Robert V Hine Gertrude E Huntington James E Landing Dean L May Lawrence J McCrank J Gordon Melton Donald E Pitzer Robert P Sutton Jon Wagner and Robert S Weisbrot Translations on Sub-Saharan Africa United States. Joint Publications Research Service, 1969 **China's Economic System** Audrey Donnithorne, 2013-10-18 First published in 1967 Based on original Chinese sources including the press and government documents this book describes the operation of the Chinese economy in the twentieth century Certain trends become apparent notably the extent to which China's economic life is decentralized and the tendency towards self sufficiency within provinces and smaller administrative units Among the topics covered are Agriculture the organization of large and small scale industry mining and transport management and labour in state enterprises The fiscal system together with the operation of the banks and the control of currency credit and prices and economic planning are also discussed **Racial and Ethnic Tensions in American Communities: The New York report** United States Commission on Civil Rights, 1993 The American as Anarchist David DeLeon, 2019-12-01 Originally published in 1978 When compared with socialist and communist systems in other nations the impact of radicalism on American society seems almost nonexistent David DeLeon challenges this position however by presenting a historical and theoretical perspective for understanding the scope and significance of dissent in America From Anne Hutchinson in colonial New England to the New Left of the 1960s DeLeon underscores a tradition of radical protest that has endured in American history a tradition of native anarchism that is fundamentally different from the radicalism of Europe the Soviet Union or nations of the Third World DeLeon shows that a profound resistance to authority lies at the very heart of the American value system The first part of the book examines how Protestant belief capitalism and even the American landscape itself contributed to the unique character of American dissent

DeLeon then looks at the actions and ideologies of all major forms of American radicalism both individualists and communitarians from laissez faire liberals to anarcho capitalists from advocates of community control to syndicalists In the book s final part DeLeon argues against measuring the American experience by the standards of communism and other political systems Instead he contends that American culture is far more radical than that of any socialist state and the implications of American radicalism are far more revolutionary than forms of Marxism Leninism **Religious Vitality in Christian Intentional Communities** Mark Killian,2017-09-25 Through ethnographic research Killian examines vitality in Philadelphia and Berea two Christian Intentional Communities whose participants live in close proximity with one another to achieve religious values Pulling from Anthony Giddens theory of structuration Killian argues that the vitality of both communities cannot be reduced to deterministic structural individual or organizational causes Rather vitality in these communities is affected by all of these causes in relationship to one another In other words it s not that each explanation matters e g social structures matter organizational behaviors matter individual religious choices matter but that these explanations matter to each other e g social structures matter to individual choices individual choices matter to organizational behaviors and social structures matter to organizational choices etc To make this argument Killian develops the idea of the vitality nexus the interconnected relationship between the various explanations of religious vitality
