from French to English Julia Landmann, 2013-01-16 French has long been the donor language par excellence in the history of English. French has contributed to the English vocabulary in the form of new words since before the Norman Conquest. The French influence on the English lexicon represents the focus of linguistic concern in a considerable number of investigations of the language and its development. Yet French borrowings which have recently been adopted into English have as yet figured little if at all in such studies. The present study sets out to shed light on the French impact on English in the recent past. The results presented in this book are based on a corpus of 1677 twentieth century French borrowings collected from the Oxford English Dictionary Online. On the basis of their meanings the words under consideration have been assigned to different subject fields in order to give a tour d horizon of the manifold areas and spheres of life enriched by French in recent times. The first part of the present investigation concentrates on the phonological and orthographical reception of the various borrowings. The focus of this study is on the semantic development of the French borrowings in comparison to their sources in the donor language. Emphasis has been placed upon analysing whether a particular meaning a borrowing assumes after its first attested use is taken over from French or whether it represents an independent semantic change within English.

It shows how heritage films construct space through music, generating what Powrie calls 'third space' music while also working to contain the strong women characters.

found in French heritage films through the use of leitmotifs and musical cues He analyses fiction films in which the protagonists perform at the piano showing how musical performance supports the performance of gender Building on aspects of musical performance and in particular the use of songs performed in films Powrie uses a database of 300 films since 2010 to theorize the intervention of music at critical moments as a crystal song Applying Roland Barthes's concept of the punctum and Gilles Deleuze's concept of the crystal image Powrie establishes the importance of the crystal song which reconfigures time as a crystallization of past present and future
