**Corporate Community Relations** Edmund M. Burke, 1999-02-28 Burke challenges the current thesis that companies should act responsibly toward communities and societies Instead he shows that changes in society mandate that companies must develop strategies and programs that foster a reputation of trust in local communities in order that they preserve their license to operate Burke describes strategies and programs of action that enable companies to develop trust and thus maintain their license to operate He also describes ways to use philanthropy and volunteer programs to achieve a competitive advantage The public environment in which companies operate has changed significantly since the 1970s

Communities in response to elected officials and community groups are demanding that companies observe new norms of behavior. They expect companies to respect the environment, respond to the concerns of the community residents, and contribute to the support of community institutions. As Burke illustrates, a company's community reputation also affects the behavior of consumers and employees. Consumers prefer to buy products from companies that are involved in the community. Employees are attracted to companies that have a good community reputation. Just as successful companies need to be a supplier of choice, an employer of choice, and an investor of choice, they now have to become a neighbor of choice. They have to behave in ways that build a legacy of trust in order to be positioned positively in the community. As Burke shows, to be a neighbor of choice, a company has to pursue three strategies: build sustainable and ongoing relationships with key community individuals, groups, and organizations; institute procedures that anticipate and respond to community expectations, concerns, needs, and issues; and focus the company's community programs on ways that promote and strengthen the community's quality of life and which also support the business goals of the company. The strategies developed by Burke will be of great use to community and public affairs managers and general managers of corporations, as well as CEOs and other executive officers. Students in courses on corporate strategy and general management will find the book of value, as will students in courses on non-profit management.

[The Business of America is Lobbying](#) Lee Drutman, 2015-03-19. Corporate lobbyists are everywhere in Washington. Of the 100 organizations that spend the most on lobbying, 95 represent business. The largest companies now have upwards of 100 lobbyists representing them. How did American businesses become so invested in politics? And what does all their money buy? Drawing on extensive data and original interviews with corporate lobbyists, *The Business of America is Lobbying* provides a fascinating and detailed picture of what corporations do in Washington, why they do it, and why it matters. Prior to the 1970s, very few corporations had Washington offices. But a wave of new government regulations and declining economic conditions mobilized business leaders. Companies developed new political capacities, and managers soon began to see public policy as an opportunity, not just a threat. Ever since, corporate lobbying has become increasingly more pervasive, more proactive, and more particularistic. Lee Drutman argues that lobbyists drove this development, helping managers to see why politics mattered and how proactive and aggressive engagement could help companies' bottom lines. All this lobbying doesn't guarantee influence. Politics is a messy and unpredictable bazaar, and it is more competitive than ever. But the growth of lobbying has driven

several important changes that make business more powerful The status quo is harder to dislodge policy is more complex and as Congress increasingly becomes a farm league for K Street more and more of Washington's policy expertise now resides in the private sector These and other changes increasingly raise the costs of effective lobbying to a level only businesses can typically afford Lively and engaging rigorous and nuanced The Business of America is Lobbying will change how we think about lobbying and how we might reform it

disappearance of communism have completely altered the world economy The supply chains of supermarkets and consumer goods industries have spread ever more widely and deeply into Asia Africa and South America while oil mining and financial companies among many others have invested heavily in countries that were previously denied to them by political or ideological barriers While companies have seized the opportunities presented by globalisation they have in many cases been completely unprepared for the risks presented by their headlong rush into these new markets Companies have found themselves and their business partners operating in countries where corruption injustice internal conflict and human rights violations are rife An increasingly alert and critical world has acted as watchdog highlighting corporate malpractice and the links between corporations and repressive regimes It has increasingly been argued that companies have responsibilities for the protection and promotion of human rights These arguments are at least to some extent accepted by companies Yet despite the increasing use of human rights language in public policy discourses the expectations of companies remain unclear That is what are the ethical imperatives What are the legal expectations How far does responsibility extend What can companies actually do in practice The debate is further complicated by the range of actors companies governments international institutions local communities non governmental organisations NGOs trade unions consumers involved by debates around free trade versus and fair trade by the discussion of the specific role of governments and by questions about the relative merits of regulation and self regulation Business and Human Rights provides an analysis of the relationship between companies and human rights in the context of globalisation The analysis is in two parts The first maps the reasons financial ethical regulatory why human rights have become a business issue However simply because there are reasons why companies should be concerned about human rights this does not say what companies should or could do Therefore the second part of the book looks at the practical experiences of companies in responding to specific human rights issues in the context of their own operations in their supply chains and in specific countries These case studies many of which have not been previously published or analysed from the perspective of human rights provide important insights into questions such as How do companies organise themselves to respond to human rights challenges What have the experiences been positive and negative How have companies responded to specific situations What are the roles and responsibilities of other actors government trade unions NGOs What are the limits to responsibility In this outstanding collection Rory Sullivan has drawn together leading thinkers and actors from the debate on business and human rights to establish how far the business and human rights debate has evolved and explore the many complex questions around roles responsibilities and solutions that remain to be answered
