Biofeedback for the Brain Paul G. Swingle, 2008 Neurofeedback is a cutting edge drug free therapeutic technique used by over a thousand licensed therapists in North America to treat a range of conditions from attention deficit and hyperactivity disorders to epilepsy stroke anxiety migraine and depression First popularized in the 1970s this naturalistic method is based on the idea that we can control our brain activity and that through training the brain can learn to modify its own electrical patterns for more efficient processing or to overcome various states of dysfunction In Biofeedback for the Brain Dr Paul G Swingle describes in clear and coherent language how these procedures work With numerous actual case examples readers follow the progress of clients from the initial brain map that shows the location and severity of the neurological abnormalities to the various stages of treatment Conditions often considered untreatable by conventional health practitioners respond positively to neurotherapeutic treatment and Swingle describes many of these remarkable recoveries Other chapters describe the use of neurotherapy for a variety of surprising purposes including performance training for elite athletes of which the most famous example is the Italian soccer team who considered the technique to be their secret weapon in attaining a World Cup victory Despite wide ranging success stories and the endorsement of the American Psychological Association many health care practitioners remain skeptical of neurofeedback and the procedures are still not well known by the public or conventional health care providers This book provides a thorough definitive and highly readable presentation of this remarkable health care
