New Directions in Empirical Translation Process Research Michael Carl, Srinivas Bangalore, Moritz Schaeffer, 2015-07-31 This volume provides a comprehensive introduction to the Translation Process Research Database TPR DB which was compiled by the Centre for Research and Innovation in Translation and Technologies CRITT The TPR DB is a unique resource featuring more than 500 hours of recorded translation process data augmented with over 200 different rich annotations Twelve chapters describe the diverse research directions this data can support including the computational statistical and psycholinguistic modeling of human translation processes In the first chapters of this book the reader is introduced to the CRITT TPR DB This is followed by two main parts the first of which focuses on usability issues and details of implementing interactive machine translation It also discusses the use of external resources and translator information interaction The second part addresses the cognitive and statistical modeling of human translation processes including co activation at the lexical syntactic and discourse levels translation literality and various annotation schemata for the data

New Directions in Human Information Behavior Amanda Spink, Charles Cole, 2006-01-31 New Directions in Human Information Behavior co edited by Drs Amanda Spink and Charles Cole provides an understanding of the new directions leading edge theories and models in human information behavior Information behavior is conceptualized as complex human information related processes that are embedded within an individual's everyday social and life processes The book presents chapters by an interdisciplinary range of scholars who show new directions that often challenge the established views and paradigms of information behavior studies Beginning with an evolutionary framework the book examines information behaviors over various epochs of human existence from the Palaeolithic Era and within pre literate societies to contemporary behaviors by 21st century humans Drawing upon social and psychological science theories the book presents a more integrated and holistic approach to the understanding of information behaviors that include multitasking and non linear longitudinal processes individuals information ground information practices and information sharing digital behaviors and human information organizing behaviors The final chapter of the book integrates these new approaches and presents an overview of the key trends theories and models for further research This book is directly relevant to information scientists librarians social and evolutionary psychologists Undergraduate and graduate students academics and information professionals interested in human information behavior will find this book of particular benefit

New Directions in Affective Disorders Bernard Lerer, Samuel Gershon, 2012-12-06 This book is presented as a 1989 update on the task set by Robert Burton in his Anatomy of Melancholy published in 1621 Burton's treatise addressed questions regarding depression which are still highly relevant today What is it with all the kinds causes symptoms prognosticks and several cures of it These remain the core issues in affective disorders notwithstanding the remarkable progress that has been made in addressing them New Directions in Affective Disorders sets out to provide an overview of what has been achieved with particular

emphasison developing trends and novel initiatives in bothfundamental research and treatment The overriding objective of the book is to integrate significant contributions from basic and clinical science into a comprehensive format which will be of value to both clinicians and researchers Intensive interest in affective illness is an inevitableconsequenceofthe frequency with which these disorders occur Depression is the most common psychiatric condition affecting as many as 50%ofpeople in Western countries at some time in their lives National Institute ofMental Health Statistics estimate that 15% of adults between 18 and 74 years ofage may be suffering from serious depressive disorders in any given year Depression is a serious condition with a high mortality A suicide rate ofapproximately 20 000 deaths per year as a result of this illness is almost certainly a conservative estimate

New Directions in Mineral Processing, Extractive Metallurgy, Recycling and Waste Minimization Ramana G. Reddy,Alexandra Anderson,Corby G. Anderson,Camille Fleuriault,Erik D. Spiller,Mark Strauss,Edgar E. Vidal,Mingming Zhang,2023-02-13 This collection addresses new research and technology for increased efficiency energy reduction and waste minimization in mineral processing extractive metallurgy and recycling Professor Patrick R Taylor and his students have been studying these topics for the past 45 years Chapters include new directions in Mineral Processing Hydrometallurgy Pyrometallurgy Electrometallurgy Metals and E waste recycling Waste minimization including by product recovery Innovations in metallurgical engineering education and curriculum development

New Directions in Sorption Technology George E. Keller,Ralph T. Yang,2013-10-22 New Directions in Sorption Technology focuses on the developments in sorption technology including sorbents chromatography pressure swing adsorption and bioseparations involving sorption The selection first offers information on coherence concept an overview of coherence in the chromatographic movement of surfactant mixtures and technological maturity of sorption processes and sorbents The book then ponders on kinetic separation of air by pressure swing adsorption conception of a new adsorption process for purifying landfill gas at the Kapiteltal Landfill Site in West Germany and sizing of vacuum pumps for desorption in PSA systems The manuscript takes a look at the evaluation of macroreticular resins as gas vapor sorbents to rival active carbons and use of surfactant enhanced carbon regeneration to remove volatile organics from spent activated carbon Discussions focus on characterization of pores development of porous polymers cleaning and resin preparation The novel applications of continuous annular chromatography and chromatographic study of aqueous phase adsorption on activated carbon fiber with bacterial growth are also mentioned The selection is a valuable source material for chemists and readers interested in sorption technology

New Directions in Atomic Physics C.T. Whelan,Reiner M. Dreizler,J.H. Macek,H.R.J. Walters,2012-12-06 The last few years have seen some remarkable advances in the understanding of atomic phenomena It is now possible to isolate atomic systems in traps measure in coincidence the fragments of collision processes routinely produce and study multicharged ions One can look at bulk matter in such a way that the fundamental atomic character is clearly evident and work has begun to tease out the properties of anti matter The papers in this book reflect many aspects of modern

Atomic Physics They correspond to the invited talks at a conference dedicated to the study of New Directions in Atomic Physics which took place in Magdalene College Cambridge in July of 1998 The meeting was designed as a way of taking stock of what has been achieved and it was hoped as a means of stimulating new research in new areas along new lines Consequently an effort was made to touch on as many directions as we could in the four days of the meeting We included some talks which overviewed whole subfields as well as quite a large number of research contributions There is a unity to Physics and we tried to avoid any artificial division between theory and experiment We had roughly the same number of talks from those who are primarily concerned with making measurements and from those who spend their lives trying to develop the theory to describe the experiments

Infrathin Marjorie Perloff, 2021-09-03 The infrathin was Marcel Duchamp's name for the thinnest shade of difference that between say the report of a gunshot and the appearance of the bullet hole on its target or between two objects in a series made from the same mold In this book the esteemed literary critic

Marjorie Perloff shows how such differences occur at the level of words and argues that it is this infrathin space this micropoetics of language that separates poetry from prose Perloff treats the relationship between Duchamp and Gertrude Stein ranges over Concrete Objectivist and Black Mountain poetry and gives stunning readings of poets from Eliot Yeats and Pound to Samuel Beckett John Ashbery and Rae Armantrout Poetry Perloff shows us exists in the play of the infrathin and it is the poet's role to create unexpected relationships verbal visual and sonic from the finest nuances of language **New**

Directions in the Russellian Theory of Time Emiliano Boccardi, L. Nathan Oaklander, Erwin Tegtmeier, 2024-11-28 The main debates in the philosophy of time have centred on whether A theory with events ordered by pastness presentness and futurity or B theory ordered by earlier than or later than are equally fundamental Emiliano Boccardi L Nathan Oaklander and Erwin Tegtmeier instead uphold the Russellian theory or R theory and consider not only the fundamental differences but also its superiority They argue McTaggart's misinterpretation of Russell has led to a false dichotomy between the A and B theories while exploring the connection between temporal relations temporal facts and time In defence of the R theory they argue how it offers a metaphysical explanation of the nature of time in addition to investigating whether ontological theories of time can be considered from a moral or existential point of view Using an ontological approach this volume clarifies what is mistaken about both theories can only be resolved by adopting a Russellian philosophy reaching beyond the A theory vs B theory debate **New Directions in the Soviet Economy** United States. Subcommittee on Foreign Economic Policy, 1966 *New Directions in Rural Preservation*, 1980 *Cryptography: An Introduction* V. V. Āshchenko, 2002 Learning about cryptography requires examining fundamental issues about information security Questions abound ranging from Whom are we protecting ourselves from and How can we measure levels of security to What are our opponent's capabilities and What are their goals Answering these questions requires an understanding of basic cryptography This book written by Russian cryptographers explains those basics Chapters are independent and can be read in any order The introduction gives a general description of all the main notions of modern cryptography a cipher a key security an electronic digital signature a cryptographic protocol etc Other chapters delve more deeply into this material The final chapter presents problems and selected solutions from Cryptography Olympiads for Russian High School Students This is an English translation of a Russian textbook It is suitable for advanced high school students and undergraduates studying information security It is also appropriate for a general mathematical audience interested in cryptography Also on cryptography and available from the AMS is *Codebreakers* Arne Beurling and the Swedish Crypto Program during World War II SWCRY *New World Situation: New Directions in Concurrent Engineering* Jerzy Pokojński, Shuichi Fukuda, Józef Salwiński, 2010-11-02 The proceedings contain papers accepted for the 17th ISPE International Conference on Concurrent Engineering which was held in Cracow Poland September 6-10 2010 Concurrent Engineering CE has a history of over twenty years At first primary focus was on bringing downstream information as much upstream as possible by introducing parallel

processing of processes in order to prevent errors at the later stage which would sometimes cause irrevocable damage and to reduce time to market During the period of more than twenty years numerous new concepts methodologies and tools have been developed During this period the background for engineering manufacturing has changed extensively Now industry has to work with global markets The globalization brought forth a new network of experts and companies across many different domains and fields in distributed environments These collaborations integrated with very high level of professionalism and specialisation provided the basis for innovations in design and manufacturing and succeeded in creating new products on a global market Recent Developments and New Direction in Soft-Computing Foundations and Applications Lotfi A.

Zadeh, Ali M. Abbasov, Ronald R. Yager, Shahnaz N. Shahbazova, Marek Z. Reformat, 2016-05-25 This book reports on advanced theories and cutting edge applications in the field of soft computing The individual chapters written by leading researchers are based on contributions presented during the 4th World Conference on Soft Computing held May 25-27 2014 in Berkeley The book covers a wealth of key topics in soft computing focusing on both fundamental aspects and applications The former include fuzzy mathematics type 2 fuzzy sets evolutionary based optimization aggregation and neural networks while the latter include soft computing in data analysis image processing decision making classification series prediction economics control and modeling By providing readers with a timely authoritative view on the field and by discussing thought provoking developments and challenges the book will foster new research directions in the diverse areas of soft computing

Christodoulides, Polina Mackay, 2012 An overview of this important early twentieth century female writer's work and career and her contribution to the development of modernism **When the Old Left Was Young** Robert Cohen, 1993-04-29 The Depression era saw the first mass student movement in American history The crusade led in large part by young Communists was both an anti war campaign and a movement championing a broader and more egalitarian vision of the welfare state than that of the New Dealers The movement arose from a massive political awakening on campus caused by the economic crisis of

the 1930s the escalating international tensions and threat of world war wrought by fascism At its peak in the late 1930s the movement mobilized at least a half million collegians in annual strikes against war Never before and not again until the 1960s were so many undergraduates mobilized for political protest in the United States The movement lost nearly all its momentum in 1939 when the signing of the Hitler Stalin pact served to discredit the student Communist leaders Adding to the emerging portrait of political life in the 1930s this book is the result of an extraordinary amount of research has fascinating individual stories to tell and offers the first comprehensive history of this student insurgency
