## **New Discoveries In Fundamental Physics And Psychology:**

**New Discoveries in Fundamental Physics and Psychology** Luis A. Carlo, 1995-12-01     *The Rationality of Theism*  
Paul Copan, Paul Moser, 2004-07-31 *The Rationality of Theism* is a controversial collection of brand new papers by thirteen outstanding philosophers and scholars. Its aim is to offer comprehensive theistic replies to the traditional arguments against the existence of God, offering a positive case for theism as well as rebuttals of recent influential criticisms of theism.

*Cosmopsychology* Gene F. Collins Jr. Ph.D., 2009-11-21 *Cosmopsychology: The Psychology of Humans as Spiritual Beings*  
*Cosmopsychology* assumes that human beings are essentially spiritual beings who are multi-dimensional, composed of many parts and connected to many dimensions of the Cosmos. It has been defined as astrology as the study of psychospiritual development and as the psychology of extraterrestrial beings. *Cosmopsychology* is the study of the relationship between the mind and the Cosmos. *Cosmopsychology* refers both to the correspondences between the human mind and the external universe and to the growth or evolution of the mind as it moves to higher forms of consciousness. It examines those parts, links and dimensions that are not found in traditional academic psychology. *Cosmopsychology* provides insights into your personality and your destiny through the contributions of astrology, numerology, the I Ching, Jung's Analytical psychology, Hartmann's Ego psychology, Bernes Transactional Analysis, Assagioli's Psychosynthesis, Hermeticism, Idealism, New Thought and the Perennial Philosophy. The mysteries of karma are laid out as they are found in the ancient Indian philosophy of Vedanta. Psychology was built on classical physics. *Cosmopsychology* is built on quantum physics, the holographic universe, string theory, M theory and F theory. Physics has come full circle, returning to the science of vibrations and the philosophy of idealism as taught by Pythagoras, Socrates and Plato. Everything is connected both spatially and temporally. At this deep level of Being, consciousness, choices, what manifests. *Cosmopsychology* encompasses the nature of consciousness, meditation, karma and rebirth and examines their roles in Individuation, Self Actualization and Self Realization.     [The Ends of Knowledge](#)  
Rachael Scarborough King, Seth Rudy, 2023-06-01 Bringing together an exciting group of knowledge workers, scholars and activists from across fields, this book revisits a foundational question of the Enlightenment: what is the last or furthest end of knowledge? It is a book about why we do what we do and how we might know when we are done. In the reorganization of knowledge that characterized the Enlightenment, disciplines were conceived as having particular ends both in terms of purposes and end points. As we experience an ongoing shift to the knowledge economy of the Information Age, this collection asks whether we still conceptualize knowledge in this way. Does an individual discipline have both an inherent purpose and a natural endpoint? What do an experiment on a fruit fly, a reading of a poem and the writing of a line of code have in common? Focusing on areas as diverse as AI, biology, Black studies, literary studies, physics, political activism and the concept of disciplinarity itself, contributors uncover a life after disciplinarity for subjects that face immediate threats to the structure, if not the substance, of their contributions. These essays, whether reflective, historical, eulogistic or polemical, chart a vital and

necessary course towards the reorganization of knowledge production as a whole

**Beyond the Brain** Stanislav Grof, 1985-01-01 Beyond the Brain seriously challenges the existing neurophysiological models of the brain After three decades of extensive research on those non ordinary states of consciousness induced by psychedelic drugs and by other means Grof concludes that our present scientific world view is as inadequate as many of its historical predecessors In this pioneering work he proposes a new model of the human psyche that takes account of his findings Grof includes in his model the recollective level or the reliving of emotionally relevant memories a level at which the Freudian framework can be useful Beyond that is perinatal level in which the human unconscious may be activated to a reliving of biological birth and confrontation with death How birth experience influences an individual s later development is a central focus of the book The most serious challenge to contemporary psycho analytic theory comes from a delineation of the transpersonal level or the expansion of consciousness beyond the boundaries of time and space Grof makes a bold argument that understanding of the perinatal and transpersonal levels changes much of how we view both mental illness and mental health His reinterpretation of some of the most agonizing aspects of human behavior proves thought provoking for both laypersons and professional therapists
