Advertising and the World Wide Web David W. Schumann, Esther Thorson, 1999-04 Volume composed of papers presented at the 1996 Advertising Consumer Psych Conf but all papers have been updated up through June 1998 Traces web advertising from its inception until now as the Web has become a high impact forum for advertising Cross-cultural Communication and Aging in the United States Hana Noor Al-Deen, 2013-10-18 Recently the communication discipline has devoted increasing energy toward the study of aging yet most of the research has insufficiently addressed a crucial factor in communicative relationships culture Meanwhile cross cultural intercultural communication has not adequately addressed the aging process Combining three powerful elements communication aging and culture all of which have an increasingly profound impact on today's multicultural society this book focuses on older Americans in various communicative contexts within the framework of their cultures Composed of original research by experts in their respective fields the book combines communication aging and culture for a unique examination of those elements in American society Section 1 deals with perspectives in cross cultural communication and aging These perspectives both illustrate the issues that greatly affect the lives of our elders and suggest ways to improve their status Section 2 showcases three American co cultures Hawaiian Arab and Mormon illustrate how language attitudes and mentoring can serve as the links for maintaining cross generational continuity in multicultural society Section 3 demonstrates that many American organizations frequently contribute to the hardships that both internal elder customers employees and external elder customers residents and patients must endure Section 4 incorporates popular culture and aging It presents the role of selective popular media in portraying our elders Because Americans rely heavily on the media their mediated perceptions can have a profound impact on their attitudes toward the older population Designed as a reader or supplementary text for college students in communication gerontology anthropology sociology and other related fields this text can also be used by professionals in gerontological service areas by libraries and as a personal reference It offers extensive appendices figures and tables for additional reference

Consuming People Nikhilesh Dholakia, A. Fuat Firat, 2003-12-16 Consumption is widely regarded as one of the most important phenomena in contemporary society but till now there has been very little analysis of how consumption patterns evolve transform and proliferate This revealing book provides an incisive treatment of consumption on a global scale from a cultural philosophical and business perspective Beginning with an analysis of how a dominant form of consumption pattern

took hold in modern capitalist market economies this book explores the contemporary changes and paradoxes in our consumption patterns during the transitional period from the modern to the postmodern The text focuses on the forces shaping American consumption patterns from corporations to Hollywood and concludes with an analysis of the emerging trans modern possibilities of the new theatre of consumption where communities with a variety of consumption styles will flourish This is an original and radical analysis in which its first rate authors structure this key topic in a multi disciplinary and forward thinking way As such it will be of great interest to students and researchers of consumer behaviour in business and the social sciences as well as those concerned with contemporary cultural transformations **Suspense** Peter

Vorderer, Hans Jurgen Wulff, Mike Friedrichsen, 2013-12-16 This volume begins with the general assumption that suspense is a major criterion for both an audience s selection and evaluation of entertaining media offerings This assumption is supported not only by the popularity of suspenseful narratives but also by the reasons users give for their actual choice of media contents Despite this there is no satisfying theory to describe and explain what suspense actually is how exactly it is caused by films or books and what kind of effect it has on audiences This book s main objective is to provide that theory by bringing together scholars from different disciplines who are working on the issue The editors goal is to reflect the state of the art as much as it is to highlight and encourage further developments in this area There are two ways of approaching the problem of describing and explaining suspense an analysis of suspenseful texts or the reception process Researchers who follow the more text oriented approach identify the uncertainty of the narrative outcome the threat or danger for the protagonist the play with time delay or other factors as important and necessary for the production of suspense The more reception oriented scholar focuses on the cognitive activities of audiences readers expectations the curiosity of onlookers their emotions and their relationships with the protagonists A correspondence between the two seems to be quite difficult though necessary to determine Both perspectives are important in order to describe and explain suspense Thus the editors utilize the thesis that suspense is an activity of the audience reader onlooker etc that is related to specific features and characteristics of the text books films etc Their question is What kind of relation The answer comes from finding out how why and which elements of the text cause effects that are experienced as suspense Scholars from semiotics literary criticism cultural studies and film theory assess the problem from a text oriented point of view dealing primarily with the how and which Other scholars present the psychological perspective by focusing on the cognitive and emotional processes that underlie viewers experience of suspense that is the reception theory tries to answer the question of why suspenseful texts may be experienced as they are **E-business** Brian Stanford-Smith, Paul T. Kidd, 2000 How can the Internet and world wide web improve my long term competitive advantage This book helps answer this question by providing a better understanding of the technologies their potential applications and the ways they can be used to add value for customers support new strategies and improve existing operations It is not just about e commerce but the broader theme of e business
