Riley, J. Charles Kelley, Campbell W. Pennington, Robert L. Rands, 2014-10-14 Whether humans crossed the seas between the Old World and the New in the times before Columbus is a tantalizing question that has long excited scholarly interest and tempted imaginations the world over From the myths of Atlantis and Mu to the more credible perhaps but hardly less romantic tales of Viking ships and Buddhist missionaries people have speculated upon what is after all not simply a question of contact but of the nature and growth of civilization itself To the specialist it is an important question indeed If people in the Western Hemisphere and in the Eastern Hemisphere developed their cultures more or less independently from

the end of the last Ice Age until the voyages of Columbus the remarkable similarities between New World and Old World cultures reveal something important about the evolution of culture If on the other hand there were widespread or sustained contacts between the hemispheres in pre Columbian times these contacts represent events of vast significance to the prehistory and history of humanity Originally delivered at a symposium held in May 1968 during the national meeting of the Society for American Archaeology the papers presented here by scholars eminent in the field offer differing points of view and considerable evidence on the pros and cons of pre Columbian contact between the Old World and the New Various kinds of data archaeological botanical geographical and historical are brought to bear on the problem with provocative and original results Introductory and concluding remarks by the editors pull together and evaluate the evidence and suggest ground rules for future studies of this sort *Man across the Sea* provides no final answers as to whether people from Asia Africa or Europe visited the American Indian before Columbus It does however present new evidence suggested lines of approach and a fresh attempt to delineate the problems involved and to establish acceptable canons of evidence for the future

The Indian Heritage of America Alvin M. Josephy, 1991 From the prehistoric peoples who inhabited the Americas at the end of the last Ice Age to the American Indian of the 20th century this book encompasses the whole historical and cultural range of Indian life in North Central and South America 32 pages of black and white photographs

Woodland Period Systematics in the Middle Ohio Valley Darlene Applegate, Robert C. Mainfort, 2005-10-09 This collection provides a comprehensive vocabulary for defining the cultural manifestation of the term Woodland The Middle Ohio Valley is an archaeologically rich region that stretches from southeastern Indiana across southern Ohio and northeastern Kentucky and into northwestern West Virginia In this area are some of the most spectacular and diverse Woodland Period archaeological sites in North America but these sites and their rich cultural remains do not fit easily into the traditional Southeastern classification system This volume with contributions by most of the senior researchers in the

field represents an important step toward establishing terminology and taxa that are more appropriate to interpreting cultural diversity in the region. The important questions are diverse: What criteria are useful in defining periods and cultural types and over what spatial and temporal boundaries do those criteria hold? How can we accommodate regional variation in the development and expression of traits used to delineate periods and cultural types? How does the concept of tradition relate to periods and cultural types? Is it prudent to equate culture types with periods? Is it prudent to equate archaeological cultures with ethnographic cultures? How does the available taxonomy hinder research? Contributing authors address these issues and others in the context of their Middle Ohio Valley Woodland Period research.

Archeological Lingages with Norh and South America at La Victoria, Guatemala , Theodore E. White and the Development of Zooarchaeology in North America R. Lee Lyman, 2016-07-01 Theodore E White and the Development of Zooarchaeology in North America illuminates the researcher and his lasting contribution to a field that has largely ignored him in its history. The few brief histories of North American zooarchaeology suggest that Paul W Parmalee, John E Guilday, Elizabeth S Wing, and Stanley J Olsen laid the foundation of the field. Only occasionally is Theodore White 1905-77 included, yet his research is instrumental for understanding the development of zooarchaeology in North America. R. Lee Lyman works to fill these gaps in the historical record and revisits some of White's analytical innovations from a modern perspective. A comparison of publications shows that not only were White's zooarchaeological articles first in print in archaeological venues but that he was also at least initially more prolific than his contemporaries. While the other founders of the field were anthropologists, White was a paleontologist by training who studied long extinct animals and their evolutionary histories. In working with remains of modern mammals, the typical paleontological research questions were off the table simply because the animals under study were too recent. And yet White demonstrated clearly that scholars could infer significant information about human behaviors and cultures. Lyman presents a biography of Theodore White as a scientist and a pioneer in the emerging field of modern anthropological zooarchaeology.

The Prehistory of the Northwest Coast R. G. Matson, Gary Coupland, 2016-09-16 This volume provides a descriptive overview of the cultural complexity on the northwest coast that stretches from northern California to Alaska. Topics covered range from the earliest settlements to the subsequent cultural diversities in Native American populations. Maps, charts, and illustrations further enhance the book's interest and appeal.
