speaks out of his own ego directed inner experiences about several motifs inherent to inner striving the problem of self in relationship to the world the disintegration of the three soul forces the transition from sense perception to spiritual perception the reality of evil the condition of loneliness and more Gaia's Sacred Chakras Margaret Bertulli, 2004 This work is a personal exploration of seven ancient sites as sacred heritage and the relation of each one to one of the seven major chakras In travelling to a sacred place one discovers the site's spiritual power within its actual setting Each site is related to a specific chakra on the basis of the author's experience there and the symbolism and concept associated with the chakra Each chapter begins with an original poem and ends with a guided meditation 2012 Daniel Pinchbeck, 2007 Draws on cosmological phenomena of the modern world as well as the author's own research into shamanic and metaphysical belief systems to support the Mayan theory about an unprecedented global shift predicted for the year 2012 <u>Pilgrim</u> Paul Post, Paulus Gijsbertus Johannes Post, Jos Pieper, Marinus van Uden, 1998 This book is the product of a relatively long history of pilgrimage research in a Dutch theological setting It is intended as a report for an international audience on this long running programme Two lines are followed in the book The first is the track of liturgical studies in which an historical European ethnological and anthropological approach has predominated The second is a social science track with specific content coming from psychology of religion The combination of these two lines has been extremely fruitful In addition to results of various surveys of contemporary pilgrimage practice and the expansion of research into ritual and cultural context in which modern pilgrims find themselves special attention is also bestowed on historiographic issues involved in orienting pilgrimage research and its theoretical and methodological aspects The places of pilgrimage examined here are Wittem Dokkum and Amsterdam in The Netherlands Banneux in Belgium Lourdes and La Salette in France and Santiago de Compostela in Spain The central question which informs the whole study is to what extent one can perhaps speak of a new type of pilgrim today the modern pilgrim The Secret of the Temple John Michael Greer, 2016-12-08 Over thousands of years the priests and sages of the ancient world discovered that the design and location of certain structures had beneficial effects on the crops that sustained life A body of traditional lore evolved using architecture and ceremonies that made use of these wholly natural but mysterious effects In The Secret of the Temple John Michael Greer painstakingly rebuilds a body of lost knowledge that has been used to accumulate and direct energy throughout history and can be used again today The Temple of Solomon was only one of many ancient structures that drew on the temple tradition The insights of this tradition have been passed down through those in society tasked with protecting ancient wisdom secret societies like the Knights Templar and the Freemasons But over time as cultures and technologies changed the meaning of these cryptic symbols and rituals became obscured until now This book explores the esoteric body of knowledge that shaped the world of our forebears gave rise to the world's most awe inspiring temples and cathedrals and continues to fuel speculation about powerful forces at work in our world **How the Heather Looks** Joan Bodger, 2022-05-17 A feast for any lover of English
