give to this promise The current economic crisis is provoking a reappraisal of both economic and educational policy Policy makers and educationists across the world see education as central to economic competitiveness However this book asks fundamental questions about the relationship between the economy and education since in contrast to policy makers rhetoric the relationship between the two sectors is not straightforward An unorthodox account of the knowledge economy and economic globalisation suggests that autonomy in the workplace and permission to think will be only given to the elite In this view many aspirant well educated middle class young workers are doomed to disappointment In this book leading scholars from the US the UK Australia and New Zealand discuss these issues and interrogate the assumptions and links between the different elements of education and how they might relate to the economy Even if we assume that the official view of the knowledge economy is correct are we educating young people to be autonomous creative thinkers Are current policies relating to knowledge learning and assessment consistent with the kinds of workers and skills required for the knowledge economy Educating for the Knowledge Economy will appeal to academics policy makers teachers and students interested in the central role of education in the knowledge economy
