Charging Forward Chris Benner, Manuel Pastor, 2024-10-22 A clarion call for justice in the quest for clean energy California s Salton Sea region is home to some of the worst environmental health conditions in the country It is also ground zero for a new lithium gold rush a race to extract a mineral critical to the rapidly expanding electric vehicle and renewable energy storage markets With enough lithium lurking beneath the surface to provide a third of global demand who will benefit from the development of this precious resource A work of stunning analysis and reporting Charging Forward shows that the questions raised by Lithium Valley lie at the heart of the green transition Weaving together movement politics federal policy and global supply chains noted experts Chris Benner and Manuel Pastor stress that extracting lithium is just a first step the real question is whether the region and the nation will address and overcome the environmental degradation labor

exploitation and racial injustice that have been as much a part of the landscape as the Salton Sea itself What happens in Lithium Valley the authors argue will not stay there This tiny patch of California is a microcosm of the broad climate challenges we face understanding Lithium Valley today is the key to grasping the future of our economy and our planet

Water Giulio Boccaletti, 2022-10-18 Spanning millennia and continents a revealing history that tackles the most important story of our time our relationship with water in a world of looming scarcity Kelly McEvers NPR Host Far more than a biography of its nominal subject The book stands as a compelling history of civilization itself The Wall Street Journal Book Review Writing with authority and brio Giulio Boccaletti honorary research associate at the Smith School of Enterprise and the Environment University of Oxford shrewdly combines environmental and social history beginning with the earliest civilizations of sedentary farmers on the banks of the Nile the Tigris and the Euphrates Rivers Even as he describes how these societies were made possible by sea level changes from the last glacial melt he incisively examines how this type of farming led to irrigation and multiple cropping which in turn led to a population explosion and labor specialization We see with clarity how irrigation's structure informed social structure inventions such as the calendar sprung from agricultural necessity how in ancient Greece the communal ownership of wells laid the groundwork for democracy how the Greek and Roman experiences with water security resulted in systems of taxation and how the modern world as we know it began with a legal framework for the development of water infrastructure Extraordinary for its monumental scope and piercing insightfulness Water A Biography richly enlarges our understanding of our relationship to and fundamental reliance on the most elemental substance on earth
