Databases and Information Systems V Hele-Mai Haav,Ahto Kalja,2009 The Eighth International Baltic Conference on Databases and Information Systems took place on June 2 5 2008 in Tallinn Estonia This conference is continuing a series of successful bi annual Baltic conferences on databases and information systems IS The aim is to provide a wide international forum for academics and practitioners in the field of databases and modern information systems for exchanging their achievements in this area The original research results presented in Databases and Information Systems V mostly belong to novel fields of IS and database research such as database technology and the semantic web ontology based IS IS and AI technologies and IS integration The contribution of Dr Jari Palom ki showed how different ontological commitments affect the way we are modeling the world when creating an information system As semantic technologies have been gaining more attention recently a special session on semantic interoperability of IS was organized The invited talks from each Baltic State gave a good insight how semantic interoperability initiatives are developing in each of the Baltic States and how they relate to the European semantic interoperability framework New Dimensions of Deep Analysis Jan Ehrenwald,2025-01-06

Originally published in 1954 New Dimensions of Deep Analysis was a systematic attempt at integrating facts which were once misrepresented as occult into the framework of modern dynamic psychiatry Defining the concepts and criteria of so called telepathic or psi phenomena Dr Ehrenwald bases his discussion on a detailed analysis of a series of telepathic dreams observed in the psychoanalytic situation These observations indicated that telepathy between analyst and patient between mother and child and in interpersonal relationships in general was far more frequent and of much greater significance than was generally allowed for Indeed its very occurrence described by the author as telepathic leakage called for a revision and restatement of some of the classical propositions of psychoanalytic theory and practice similar to that which had become necessary in the field of modern theoretical physics nearly half a century before He redefines personality as an open versus a closed system made up of a three fold stratification of ego id and psi levels In his outline of what he describes as three level therapy he tries to apply these concepts to the doctor patient relationship and to come to grips with the magic element involved in the therapeutic process in accordance with established psychodynamic principles Today it can be read in its historical context **Data Warehousing and Knowledge Discovery** Ladjel Bellatreche,Mukesh K.
