**Individuals as Producers of Their Development** Richard M Lerner,Nancy A. Busch-Rossnagel,2013-09-03 Individuals as Producers of Their Development A Life Span Perspective provides an assessment of the usefulness of viewing the individual as an active contributor to his or her development It extends the breadth of organism environment reciprocities beyond those involved with the child and family On the one hand this extension involves a consideration of the role of evolutionary biological processes on the other it pertains to the broader ecology of human development the social network lying outside the family and the physical environmental contexts of development Person context reciprocities linked to variables that may play their greatest role in the extrafamilial context are also considered Variables such as physical attractiveness race and physical handicap are examples of those discussed in this regard Finally because of the greater scope of the analysis a potentially greater data base is examined in a search for documentation of the presence and role of dynamic person context interactions      **Evolutionary Developmental Biology** ,2021-02-16 Evolutionary Developmental Biology Volume 141 focuses on recent research in evolutionary developmental biology the science studying how changes in development cause the variations that natural selection operate on Several new hypotheses and models are presented in this volume and these concern how homology may be properly delineated how neural crest and placode cells emerged and how they formed the skull and jaw and how plasticity and developmental symbiosis enable normal development to be regulated by environmental factors New models for homology New hypotheses for the generation of chordates New models for the roles of plasticity and symbionts in normal development      *Current Catalog* National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70      *The Evolution of Childhood* Melvin Konner,2011-11-30 This book is an intellectual tour de force a comprehensive Darwinian interpretation of human development Looking at the entire range of human evolutionary history Melvin Konner tells the compelling and complex story of how cross cultural and universal characteristics of our growth from infancy to adolescence became rooted in genetically inherited characteristics of the human brain All study of our evolution starts with one simple truth human beings take an extraordinarily long time to grow up What does this extended period of dependency have to do with human brain growth and social interactions And why is play a sign of cognitive complexity and a spur for cultural evolution As Konner explores these questions and topics ranging from bipedal walking to incest taboos he firmly lays the foundations of psychology in biology As his book eloquently explains human learning and the greatest human intellectual accomplishments are rooted in our inherited capacity for attachments to each

other In our love of those we learn from we find our way as individuals and as a species Never before has this intersection of the biology and psychology of childhood been so brilliantly described Nothing in biology makes sense except in the light of evolution wrote Dobzhansky In this remarkable book Melvin Konner shows that nothing in childhood makes sense except in the light of evolution [List of Journals Indexed for MEDLINE](#) ,2005 [Routledge Handbook of Communication Disorders](#) Ruth H. Bahr, Elaine R. Silliman, 2015-04-24 The Routledge Handbook of Communication Disorders provides an update on key issues and research in the clinical application of the speech language and hearing sciences in both children and adults Focusing on areas of cutting edge research this handbook showcases what we know about communication disorders and their assessment and treatment It emphasizes the application of theory to clinical practice throughout and is arranged by the four key bases of communication impairments Neural Genetic Bases Perceptual Motor Bases Cognitive Linguistic Bases Socio Cultural Bases The handbook ends with an integrative section which looks at innovative ways of working across domains to arrive at novel assessment and treatment ideas It is an important reference work for researchers students and practitioners working in communication science and speech and language therapy
