Standards-based School Mathematics Curricula Sharon L. Senk, Denisse R. Thompson, 2020-07-24 The Curriculum and Evaluation Standards for School Mathematics published by the National Council of Teachers of Mathematics in 1989 set forth a broad vision of mathematical content and pedagogy for grades K 12 in the United States These Standards prompted the development of Standards based mathematics curricula What features characterize Standards based curricula How well do such curricula work To answer these questions the editors invited researchers who had investigated the implementation of 12 different Standards based mathematics curricula to describe the effects of these curricula on students learning and achievement and to provide evidence for any claims they made In particular authors were asked to identify content on which performance of students using Standards based materials differed from that of students using more traditional materials and content on which performance of these two groups of students was virtually identical Additionally four scholars not involved with the development of any of the materials were invited to write critical commentaries on the work reported in the other chapters Section I of Standards Based School Mathematics Curricula provides a historical background to place the current curriculum reform efforts in perspective a summary of recent recommendations to reform school mathematics and a discussion of issues that arise when conducting research on student outcomes Sections II III and IV are devoted to research on mathematics curriculum projects for elementary middle and high schools respectively The final section is a commentary by Jeremy Kilpatrick Regents Professor of Mathematics Education at the University of Georgia on the research reported in this book It provides a historical perspective on the use of research to guide mathematics curriculum reform in schools and makes additional recommendations for further research In addition to the references provided at the end of each chapter other references about the Standards based curriculum projects are provided at the end of the book This volume is a valuable resource for all participants in discussions about school mathematics curricula including professors and graduate students interested in mathematics education curriculum development program evaluation or the history of education educational policy makers teachers parents principals and other school administrators The editors hope that the large body of empirical evidence and the thoughtful discussion of educational

values found in this book will enable readers to engage in informed civil discourse about the goals and methods of school mathematics curricula and related research

Educating Everybody's Children Robert W. Cole W. Cole, 2008-06-15 Designed to promote reflection discussion and action among the entire learning community *Educating Everybody's Children* encapsulates what research has revealed about successfully addressing the needs of students from economically ethnically culturally and linguistically diverse groups and identifies a wide range of effective principles and instructional strategies Although good teaching works well with all students educators must develop an extensive repertoire of instructional tools to meet the varying needs of students from diverse backgrounds Those tools and the knowledge base behind them are the foundation of this expanded and revised second edition of *Educating Everybody's Children* Each strategy discussed in the book includes classroom examples and a list of the research studies that support it The most important thing we have learned as a result of the education reform movement is that student achievement stands or falls on the motivation and skills of teachers We must ensure that all teachers are capable of delivering a standards based curriculum that describes what students should know and be able to do and that these standards are delivered by means of a rich and engaging pedagogy of plenty By these two acts we can ensure that all schools will be ready and able to educate everybody's children
