New Money, Nice Town Leonard Nevarez,2014-01-14 The economic restructuring that has gone on since the 1980s has produced a new economic space in which service and high tech firms are at the forefront of innovation One of the features of the new economy is what pop geographer Joel Kotkin calls nerdistans or smaller cities with a substantial high tech sector limits on growth environmentally friendly policies and a generally well educated population In New Money Nice Town Leonard Nevarez takes a close look at how new economy firms in quality of life cities interact with local political structures finding that they are both more liberal and more detached than their traditional counterparts This new global economy has created communities whose politics are more democratic but also more tenuous and unstable

Consuming Schools Trevor Norris,2011-01-01 The increasing prevalence of consumerism in contemporary society often equates happiness with the acquisition of material objects Consuming Schools describes the impact of consumerism on politics and education and charts the increasing presence of commercialism in the educational sphere through an examination of issues such as school business partnerships advertising in schools and corporate sponsored curriculum First linking the origins of consumerism to important political and philosophical thinkers Trevor Norris goes on to closely examine the distinction between the public and the private sphere through the lens of twentieth century intellectuals Hannah Arendt and Jean Baudrillard Through Arendt s account of the human activities of labour work and action and the ensuing eclipse of the public realm and Baudrillard s consideration of the visual character of consumerism Norris examines how school commercialism has been critically engaged by in class activities such as media literacy programs and educational policies regulating school business partnerships

Factors Influencing the Buying Decision of Consumers' towards

Branded Biscuits Dr. M. Ganesh Babu, *The Competitive Destination* J. R. Brent Ritchie, Geoffrey Ian Crouch, 2003 The purpose of this book is to provide a framework for understanding the complex and multifaceted nature of the factors that affect destination competitiveness It provides guidance on how to create successful destinations by developing and presenting a conceptual model of destination competitiveness that recognizes the importance of sustainability for long term success The book is both theoretically sound and managerially useful It is intended to appeal to both academic researchers and industry professionals and practitioners Anyone with an interest in the enhancement of a destination s competitiveness from nations to small towns or regions will find this book invaluable International Bibliography of Sociology Compiled by the British Library of Political and Economic Science, 2002-12 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge on the social sciences Research Handbook on Methods and Models of Competition Law Deborah Healey, Michael Jacobs, Rhonda L. Smith, 2020-11-27 This comprehensive Handbook illuminates the objectives and economics behind competition law It takes a global comparative approach to explore competition law and policy in a range of jurisdictions with differing political economies legal systems and stages of development A set of expert international contributors examine the operation and enforcement of competition law around the world in order to globalize discussions surrounding the foundational issues of this topic In doing so they not only reveal the range of approaches to competition law but also identify certain basic economic concepts and types of anticompetitive conduct that are at the core of competition law

Antitrust Law in the New Economy Mark R. Patterson, 2017-02-01 Markets run on information Buyers make decisions by relying on their knowledge of the products available and sellers decide what to produce based on their understanding of what buyers want But the distribution of market information has changed as consumers increasingly turn to sources that act as intermediaries for information companies like Yelp and Google Antitrust Law in the New Economy considers a wide range of problems that arise around one aspect of information in the marketplace its quality Sellers now have the ability and motivation to distort the truth about their products when they make data available to intermediaries And intermediaries in turn have their own incentives to skew the facts they provide to buyers both to benefit advertisers and to gain advantages over their competition Consumer protection law is poorly suited for these problems in the information economy Antitrust law designed to regulate powerful firms and prevent collusion among producers is a better choice But the current application of antitrust law pays little attention to information quality Mark Patterson discusses a range of ways in which data can be manipulated for competitive advantage and exploitation of consumers as happened in the LIBOR scandal and he considers novel issues like confusopoly and sellers use of consumers personal information in direct selling Antitrust law can and should be adapted for the information economy Patterson argues and he shows how courts can apply antitrust to address today s problems

Trade, Competition and Domestic Regulatory Policy Shanker A. Singham, Alden F. Abbott, 2023-03-29

Trade Competition and Domestic Regulatory Policy presents a unique combination of analysis of both international trade and investment policies and competition and regulatory policies. Increasingly, policymakers, businesses, and the law and economics professions need to better understand how changes and policy developments in international trade and competition have developed and how their interaction impacts on global business. In addition to providing a comprehensive analysis of the attempts of international trade theory and practice to deal with tariffs, non-tariff barriers, market distortions, and failures to protect various kinds of property rights, this book contains a detailed treatment of how property rights protection, including intangible property rights, are a critical element of ensuring open trade and competitive markets. It examines how these rights have developed over time and how they have been integrated into trade and competition policy. This book will be of significant interest to students of international business, professors of economics, law, and business, and policymakers at the intersection of trade, investment, competition, and property rights.

Law and the "Sharing Economy" Derek McKee, Finn Makela, Teresa Scassa, 2018-11-27 Controversy shrouds sharing economy platforms. It stems partially from the platforms' economic impact, which is felt most acutely in certain sectors. Uber drivers compete with taxi drivers; Airbnb hosts compete with hotels. Other consequences lie elsewhere. Uber is associated with a trend toward low-paying, precarious work, whereas Airbnb is accused of exacerbating real estate speculation and raising the cost of long-term rental housing. While governments in some jurisdictions have attempted to rein in the platforms, technology has enabled such companies to bypass conventional regulatory categories, generating accusations of unfair competition as well as debates about the merits of existing regulatory regimes. Indeed, the platforms blur a number of familiar distinctions, including personal versus commercial activity, infrastructure versus content, contractual autonomy versus hierarchical control. These ambiguities can stymie legal regimes that rely on these distinctions as organizing principles, including those relating to labour, competition, tax, insurance, information, the prohibition of discrimination, as well as specialized sectoral regulation. This book is organized around five themes: technologies of regulation; regulating technology; the sites of regulation, local to global; regulating markets; and regulating labour. Together, the chapters offer a rich variety of insights on the regulation of the sharing economy, both in terms of the traditional areas of law they bring to bear and the theoretical perspectives that inform their analysis. Published in English.

The Digital Markets Act Konstantina Bania, Damien Geradin, 2024-12-12 This book provides an in-depth exploration of the Digital Markets Act (DMA). With an ensemble of contributors who have been involved in major antitrust cases that shaped the legislative text, the book explains the rationale for the DMA, introduces the reader to the digital services falling within its scope, sets out the process for gatekeeper designation, and provides insights into the interpretation, issues, and enforcement challenges that arise from the obligations it establishes. Analysing the DMA in the broader legal and market context, the chapters examine tensions between the DMA and other EU and national rules governing the conduct of online platforms, compare the DMA to similar initiatives undertaken in other jurisdictions, and bring perspectives from other

disciplines such as data protection regulation A companion website reports on important developments in relation to the DMA such as the decisions designating tech giants as gatekeepers and subsequent litigation arising therefrom and provides links to analysis discussing the developments An authoritative treatment of the DMA is paired with an easy to follow writing style to make this comprehensive compendium essential reading for practitioners judges regulators and researchers working on matters relating to the digital economy

Big Data and Competition Law Alptekin Koksak, 2023-11-13 Recent studies on competition law and digital markets reveal that accumulating personal information through data collection and acquisition methods benefits consumers considerably Free of charge fast and personalised services and products are offered to consumers online Collected data is now an indispensable part of online businesses to the point that a new economy a data driven sector has emerged Many markets such as the social network search engine online advertising and e commerce are regarded as data driven markets in which the utilisation of Big Data is a requisite for the success of operations However the accumulation and use of data brings competition law concerns as they contribute to market power in the online world resulting in a few technology giants gaining unprecedented market power due to the Big Data accumulation indirect network effects and the creation of online ecosystems As technology giants have billions of consumers worldwide data driven markets are truly global In these data driven markets technology giants abuse their dominant positions but existing competition law tools seem ineffective in addressing market power and assessing abusive behaviour related to Big Data This book argues that a novel approach to the data driven sector must be developed through the application of competition law rules to address this It argues that current and potential conflicts can be mitigated by extending the competition law assessment beyond the current competition law tools to offer a modernised and unified approach to the Big Data related competition issues Promoting new legal tests for addressing the market power of technology giants and assessing abusive behaviour in data driven markets this book advocates for cooperation between competition and data protection authorities It will be of interest to students academics and practitioners with an interest in competition law and data protection

Antitrust Analysis of Online Sales Platforms & Copyright Limitations and Exceptions Bruce Kilpatrick, Pierre Kobel, Pranvera Këllezi, 2018-07-03 This book gathers international and national reports from across the globe on key questions in the field of antitrust and intellectual property The first part discusses the application of competition law to online sales platforms which is increasingly a focus for anti trust authorities around the world A detailed international report explores which are the major challenges for competition law generated by the growth of online platforms It provides an excellent comparative study of this complex and challenging subject The second part of the book gathers contributions from various jurisdictions on the topic To what extent do current exclusions and limitations to copyright strike a fair balance between the rights of owners and fair use by private individuals and others This section presents an international report which offers an unparalleled comparative analysis of this topic bringing together common themes and contrasting the various national provisions dealing with

exceptions to copyright amongst other things The book also includes the resolutions passed by the General Assembly of the International League of Competition Law LIDC following a debate on each of these topics which include proposed solutions and recommendations The LIDC is a long standing international association that focuses on the interface between competition law and intellectual property law including unfair competition issues

The Economics of Online Markets and ICT Networks Russel Cooper, Gary Madden, Ashley Lloyd, Michael Schipp, 2006-07-25 This volume examines the economics of platform structure and firm competition within and between online markets It also details modern theoretical treatments of regulatory intervention in online markets and the consideration of forward looking experimental analysis of demand for yet to be provided services The volume is divided into three parts innovation and competition in online markets regulation pricing and evaluation with real options and empirical approaches to market analysis

Competition Law's Innovation Factor Viktoria H S E Robertson, 2020-02-06 In recent years market definition has come under attack as an analytical tool of competition law Scholars have increasingly questioned its usefulness and feasibility That criticism comes into sharper relief in dynamic innovation driven markets which do not correspond to the static markets on which the concept of the relevant market was modelled This book explores that controversy from a comparative legal perspective taking into account both EU competition and US antitrust law It examines the manifold ways in which courts and competition authorities in the EU and US have factored innovation related considerations into market delineation covering innovative product markets product differentiation future markets issues going beyond market definition proper such as innovation competition innovation markets and potential competition intellectual property rights innovative aftermarkets and multi sided platforms This book finds that going forward the role of market definition in dynamic contexts needs to focus on its function of market characterisation rather than on the assessment of market power
