The New England Image. [With Illustrations.]. Samuel Chamberlain, 1960 *The New England Image* Samuel Chamberlain, 1962 Photographs of New England the countryside famous houses covered bridges water mills historic landmarks etc *Landscape and Images* John R. Stilgoe, 2015-02-12 John Stilgoe is just looking around This is more difficult than it sounds particularly in our mediated age when advances in both theory and technology too often seek to replace the visual evidence before our own eyes rather than complement it We are surrounded by landscapes charged with our past and yet from our earliest schooldays we are instructed not to stare out the window Someone who stops to look isn't only a rarity he or she is suspect *Landscape and Images* records a lifetime spent observing America's constructed landscapes Stilgoe's essays follow the eclectic trains of thought that have resulted from his observation from the postcard preference for sunsets over sunrises to the concept of teen geography to the unwillingness of Americans to walk up and down stairs In Stilgoe's hands the subject of jack o lanterns becomes an occasion to explore centuries old concepts of boundaries and trespassing and to examine why this originally pagan symbol has persisted into our own age Even something as mundane as putting the cat out before going to bed is traced back to fears of unwatched animals and an untended frontier fireplace Stilgoe ponders the forgotten connections between politics and painted landscapes and asks why a country whose vast majority lives less than a hundred miles from a coast nonetheless looks to the rural Midwest for the classic image of itself At times breathtaking in their erudition the essays collected here are as meticulously researched as they are elegantly written Stilgoe's observations speak to specialists whether they be artists historians or environmental designers as well as to the common reader Our landscapes constitute a fascinating history of accident and intent The proof says Stilgoe is all around us **The Image Is Everything Presidency** Gilbert St. Clair, 2018-03-09 Image is everything Today our television and movie stars our athletes and our politicians carefully craft images for public consumption Even our country's Executive Chief is not immune to a bit of image manipulation If presidents can not always actually satisfy the public's excessive contradictory and unrealistic expectations they can at least present a compelling image of presidential leadership and success When it comes to the modern presidency tennis star Andre Agassi was correct Image is everything Image creation is a serious business with critically important implications for the success of any politician But presidents must be careful in deciding how they craft the ways in which we perceive them If they are to succeed presidents must present an appropriate image of leadership to the American people an image that is appropriate for the particular needs of the time when the president governs and is appropriate to the personality of that president Their ultimate goal is to convince the public that they are actually providing leadership even if in reality they have only a limited ability to effect outcomes This book examines the way American presidents in the media age have shaped their public personas as a means of cultivating and advancing their political and ideological agendas Images play an important role in the perceived success or failure of our presidents Since public

expectations are most often aimed directly at the White House and its central occupant it is more important than ever that a president control his image as well as presenting the right image to the American public Reality thus becomes secondary and image is everything

Pumpkin Cindy Ott, 2012-12-01 Why do so many Americans drive for miles each autumn to buy a vegetable that they are unlikely to eat While most people around the world eat pumpkin throughout the year North Americans reserve it for holiday pies and other desserts that celebrate the harvest season and the rural past They decorate their houses with pumpkins every autumn and welcome Halloween trick or treaters with elaborately carved jack o lanterns Towns hold annual pumpkin festivals featuring giant pumpkins and carving contests even though few have any historic ties to the crop In this fascinating cultural and natural history Cindy Ott tells the story of the pumpkin Beginning with the myth of the first Thanksgiving she shows how Americans have used the pumpkin to fulfill their desire to maintain connections to nature and to the family farm of lore and ironically how small farms and rural communities have been revitalized in the process And while the pumpkin has inspired American myths and traditions the pumpkin itself has changed because of the ways people have perceived valued and used it Pumpkin is a smart and lively study of the deep meanings hidden in common things and their power to make profound changes in the world around us

Transatlantic Images and Perceptions David E. Barclay, Elisabeth Glaser-Schmidt, 2003-02-13 Over the last two centuries Germans and Americans have been rivals friends opponents and most recently allies This 1997 cross disciplinary collection of essays analyses how German and American views of each other developed and periodically shifted providing a fresh analysis of the often complex German American relationship The images that resulted from encounters between the two countries frequently reflected significant cross currents of the contemporary relations and often foreshadowed important trends The nine German and eight American contributors to this volume analysed travelogues private letters diaries diplomatic reports and newspaper articles from the wake of US independence through the reunification of Germany and also post 1945 movies that reflect these cross cultural encounters and illustrate how political agendas prejudices stereotypes and pragmatic forces influenced individual group and mass perceptions of the other society

Sum of the Parts Kent C Ryden, 2011-04-01 Proponents of the new regional history understand that regional identities are constructed and contested multifarious and not monolithic that they involve questions of dominance and power and that their nature is inherently political In this lively new book writing in the spirit of these understandings Kent Ryden engagingly examines works of American regional writing to show us how literary partisans of place create and recreate attack and defend argue over and dramatize the meaning and identity of their regions in the pages of their books Cleverly drawing upon mathematical models that complement his ideas and focusing on both classic and contemporary literary regionalists Ryden demonstrates that regionalism in the cultural sense retains a great deal of power as a framework for

literary interpretation For New England he examines such writers as Robert Frost and Hayden Carruth Mary E Wilkins Freeman and Edith Wharton and Carolyn Chute and Russell Banks to demonstrate that today's regionalists inspire closer more democratic readings of life and landscape For the West and South he describes Wallace Stegner's and William Faulkner's use of region to respectively exclude and evade or confront and indict For the Midwest he focuses on C J Hribal William Least Heat Moon Paul Gruchow and others to demonstrate that midwesterners continually construct the past anew from the materials at hand filling the seemingly empty midlands with history and significance Ryden reveals that there are many Wests many New Englands many Souths and many Midwesterns all raising similar issues about the cultural politics of region and place Writing with appealing freshness and a sense of adventure he shows us that place and the stories that emerge from and define place can be a source of subversive energy that blunts the homogenizing force of region inscribing marginal places and people back onto the imaginative surface of the landscape when we read it on a place by place landscape by landscape book by book basis

Between Two Worlds Malcolm Gaskill, 2014-11-11 In the 1600s over 350 000 intrepid English men women and children migrated to America leaving behind their homeland for an uncertain future Whether they settled in Jamestown Salem or Barbados these migrants entrepreneurs soldiers and pilgrims alike faced one incontrovertible truth England was a very very long way away In *Between Two Worlds* celebrated historian Malcolm Gaskill tells the sweeping story of the English experience in America during the first century of colonization Following a large and varied cast of visionaries and heretics merchants and warriors and slaves and rebels Gaskill brilliantly illuminates the often traumatic challenges the settlers faced The first waves sought to recreate the English way of life even to recover a society that was vanishing at home But they were thwarted at every turn by the perils of a strange continent unaided by monarchs who first ignored then exploited them As these colonists strove to leave their mark on the New World they were forced by hardship and hunger by illness and infighting and by bloody and desperate battles with Indians to innovate and adapt or perish As later generations acclimated to the wilderness they recognized that they had evolved into something distinct no longer just the English in America they were perhaps not even English at all These men and women were among the first white Americans and certainly the most prolific And as Gaskill shows in learning to live in an unforgiving world they had begun a long and fateful journey toward rebellion and finally independence

Mobility and Identity in US Genre Painting Lacey Baradel, 2020-12-31 This book examines the portrayal of themes of boundary crossing itinerancy relocation and displacement in US genre paintings during the second half of the long nineteenth century c 1860 1910 Through four diachronic case studies the book reveals how the high stakes politics of mobility and identity during this period informed the production and reception of works of art by Eastman Johnson 1824 1906 Enoch Wood Perry Jr 1831 1915 Thomas Hovenden 1840 95 and John Sloan 1871 1951 It also complicates art history's

canonical understandings of genre painting as a category that seeks to reinforce social hierarchies and emphasize more rooted connections to place by instead privileging portrayals of social flux and geographic instability The book will be of interest to scholars working in art history literature American studies and cultural geography *The Making of the Primitive Baptists* James R. Mathis, 2012-10-02 This study describes the creation of the Primitive Baptist movement and discusses the main outlines of their thought It also weaves the story of the Primitive Baptists with other developments in American Christianity in the Early Republic **Maine's Place in the Environmental Imagination** Michael D.

Burke, 2020-12-15 The essays in *Maine's Place in the Environmental Imagination* address from a variety of perspectives how Maine's unique identity among the states of the United States has been formed and what that identity is A place that is still imagined by others primarily through its environmental associations its nature and landscape rather than through its social arrangements and human history The collection attempts a foundational study not of a regional literature but of a state literature In doing so it makes the case that Maine was constructed imaginatively and environmentally through its literature and that this image is the one that endures even now The essays suggest how this identity was formed by discussing writings ranging from the recently recovered work of Joseph Nicolar a member of the Penobscot Nation in the late 19th century to the contemporary Maine author Carolyn Chute from Thoreau's canonical essay *Ktaadn* to the modernist E B White whose works have an under appreciated environmental project Contributors include scholars Nathaniel Lewis Annette Kolodny Linda Kornasky Daniel Malachuk Kent Ryden and Lynn Wake
