Forbes Burnham Linden F. Lewis, 2024-01-12 It is virtually impossible to understand the history of modern Guyana without understanding the role played by Forbes Burnham As premier of British Guiana he led the country to independence in 1966 and spent two decades as its head of state until his death in 1985 An intensely charismatic politician Burnham helped steer a new course for the former colony but he was also a quintessential strongman leader venerated by some of his citizens yet feared and despised by others Forbes Burnham The Life and Times of the Comrade Leader is the first political biography of this complex and influential figure It charts how the political party he founded the People s National Congress combined nationalist rhetoric socialist policies and Pan Africanist philosophies It also explores how in a country already deeply divided between the descendants of African slaves and Indian indentured servants Burnham consolidated political power by intensifying ethnic polarizations Drawing from historical archives as well as new interviews with the people who knew Burnham best sociologist Linden F Lewis examines how his dictatorial tendencies coexisted with his progressive convictions Forbes Burnham is a compelling study of the nature of postcolonial leadership and its pitfalls

Arnold M. Ludwig, 2002-01-01 People may choose to ignore their animal heritage by interpreting their behavior as divinely inspired socially purposeful or even self serving all of which they attribute to being human but they masticate fornicate and procreate much as chimps and apes do so they should have little cause to get upset if they learn that they act like other primates when they politically agitate debate abdicate placate and administrate too from the book King of the Mountain presents the startling findings of Arnold M Ludwig s eighteen year investigation into why people want to rule The answer may seem obvious power privilege and perks but any adequate answer also needs to explain why so many rulers cling to power even when they are miserable trust nobody feel besieged and face almost certain death Ludwig s results suggest that leaders of nations tend to act remarkably like monkeys and apes in the way they come to power govern and rule Profiling every ruler of a recognized country in the twentieth century over 1 900 people in all Ludwig establishes how rulers came to power how they lost power the dangers they faced and the odds of their being assassinated committing suicide or dying a natural death Then concentrating on a smaller sub set of 377 rulers for whom more extensive personal information was available he compares six different kinds of leaders examining their characteristics their childhoods and their mental stability or instability to identify the main predictors of later political success Ludwig s penetrating observations though presented in a lighthearted and entertaining way offer important insight into why humans have engaged in war throughout recorded history as well as suggesting how they might live together in peace Caribbean Women Veronica Marie Gregg, 2005
