Shmailov, 2016-08-29 Who was Nicolas Rashevsky To answer that question this book draws on Rashevsky's unexplored personal archival papers and shares interviews with his family students and friends as well as discussions with biologists and mathematical biologists to flesh out and complete the picture Most modern day biologists have never heard of Rashevsky Why In what constitutes the first detailed biography of theoretical physicist Nicolas Rashevsky 1899 1972 spanning key aspects of his long scientific career the book captures Rashevsky's ways of thinking about the place mathematical biology should have in biology and his personal struggle for the acceptance of his views It brings to light the tension between mathematicians theoretical physicists and biologists when it comes to the introduction of physico-mathematical tools into biology Rashevsky's successes and failures in his efforts to establish mathematical biology as a subfield of biology provide an important test case for understanding the role of theory in particular mathematics in understanding the natural world With the biological sciences moving towards new vistas of inter and multi-disciplinary collaborations and research programs the book will appeal to a wide readership ranging from historians sociologists and ethnographers of American science and culture to students and general readers with an interest in the history of the life sciences mathematical biology and the social construction of science *Mathematical Theory of Human Relations* Nicolas Rashevsky, 1947 *The History Of Game Theory, Volume 1* Mary-Ann Dimand, Robert W Dimand, 1996-08-08 Game Theory the formal modelling of conflict and cooperation first emerged as a recognized field with a publication of John von Neumann and Oskar Morgenstern's *Theory of Games and Economic Behaviour* in 1944 Since then game theoretic thinking about choice of strategies and the interdependence of people's actions has influenced all the social s **Nonlinear Dynamics, Mathematical Biology, And Social Science** Joshua M. publication of John von Neumann and Oscar Morgenstern's seminal *Theory of Games and Economic Behavior* in 1944 and the theory's revival in economics in the 1980s Drawing on a diverse collection of institutional archives personal correspondence and papers and interviews Paul Erickson shows how game theory offered social scientists biologists military strategists and others a common flexible language that could facilitate wide ranging thought and debate on some of the most critical issues of the day

*The Method of Response Function in Psychology & Sociology* Irina G. Malkina-Pykh, Y. A. Pykh, 2013 Social psychological and sociological systems present considerable difficulties for modellers due to their complexity multidimensionality uncertainty and irreducibility The book proposes that response functions MRF be used as a method of constructing purposeful credible and integrated social systems models from data and prior knowledge or information A semi empirical or grey box MRF model may be regarded as a trade off between a knowledge based model and a black box empirical model It may embody all the existing knowledge on the process or a part thereof and in addition it relies on parameterised functions whose parameters are determined from measurements Observations contain hidden information on the processes under consideration and one of the main purposes of the proposed method is to extract and describe these hidden relationships Parameterisation offers ways to couple qualitative with quantitative analysis This combination makes it possible to take into account all the phenomena that are not modelled with the required accuracy through prior knowledge Although only a simplified picture of the processes is modelled a grey box system model provides some insight into the system processes These processes are featured by chains of causality highlighting stressors and variables responsive to stressors The method of response functions is a nonlinear regression method that implies credible models in the sense that they are identifiable and hopefully explain system output behaviour satisfactorily For case studies the authors have selected the problems usually studied by psychologists and sociologists with statistical procedures such as investigation of variance and discriminant analysis based on the general linear model or one of its multivariate generalisations structural equation models etc disordered eating and obesity subjective well being and alexithymia An accompanying CD ROM contains the demonstration versions of three models that are discussed in the various chapters *The Method of Response Functions in Psychology and Sociology* is aimed at Mathematical Psychologists Mathematical Sociologists Applied Psychologists Sociologists and Social Practitioners It will also be suitable for use on undergraduate as well as graduate and postgraduate courses specializing in these areas

*Social Influence Network Theory* Noah E. Friedkin, Eugene C. Johnsen, 2011-04-18 Social influence network theory presents a mathematical formalization of the social process of attitude changes that unfolds in a social network of interpersonal influences This book brings the theory to bear on lines of research in the domain of small group dynamics concerned with changes of group

members positions on an issue including the formation of consensus and of settled disagreement via endogenous interpersonal influences in which group members are responding to the displayed positions of the members of the group Social influence network theory advances a dynamic social cognition mechanism in which individuals are weighing and combining their own and others positions on an issue in the revision of their own positions The influence network construct of the theory is the social structure of the endogenous interpersonal influences that are involved in this mechanism With this theory the authors seek to lay the foundation for a better formal integration of classical and current lines of work on small groups in psychological and sociological social psychology Personnel Research United States Civil Service Commission.
