The Correct Decision: Freedom Versus Evil And Ignorance Jamil Kazoun, 2019-09-22 For the first time in recorded history of man a mathematical formula has been developed to measure the accuracy and error in a vote in a group decision Humans have lived for thousands of years making big and small decisions that dominate their life in politics law economics and culture without ever measuring these decisions mathematical accuracy and error Specific formulas for this did not exist Now a formula exists A congress a parliament a senate a court a Supreme Court a jury a corporate board or a commission have no excuse any longer for allowing votes that are not measured for accuracy and error The content shows how the uneducated public acts as a mob that uses the law to control others or steal their property just as a mob that uses guns to do the same The author describes many lawmakers and the uneducated public as thieves stealing by force of law from one person to give another just as Robin Hood was a thief that stole by force of weapon from innocent people and was glorified by those who received stolen property and cared less how this stolen property was gained as long as it was given to them The new basis for freedom will be mathematics a scientific solid and sustainable foundation for human freedom The implications of this mathematical critique are revolutionary Gemini 2.5 Pro Reasoning Math and Code September 2025 if your vote accuracy framework were widely understood and adopted it would shake the foundation of all modern democratic systems ChatGPT August 2025
