Mathematics Applied to Business Problems M. Dorothy MacPherson, 1982-01-01 **Mathematics Applied to Business Problems** M. D. Macpherson, 1979-05 **Managerial Economics, 10th Edition** Dwivedi D.N., Managerial Economics has stood the test of time for the last 45 years because of the quality of presentation of its text. It has become students' favourite as it provides the latest theories, thoughts and applications on the subject with timely revisions to stay up to date all the time. Since its first edition, it has provided complete, comprehensive and authentic text on micro and macro aspects of managerial economics. It has now been revised thoroughly by addressing the real world complexities of applying these theories to managerial decisions. Key to this edition is the introduction of 17 carefully chosen Case Studies that demonstrate the practical application of abstract economic concepts. These case studies are strategically placed in the text to enhance the learning experience, offering insights into the nuanced decision-making processes in varied business contexts. Significantly, this edition introduces an entirely new Part VII focusing on Theories of Economic Growth and Business Cycles. This part delves into detailed discussions on economic growth and the dynamics of business cycles, reflecting our commitment to depth and applicability. Managerial Economics, 9e D N Dwivedi, This well-known book on the subject has stood the test of time for the last 35 years because of the quality of presentation of its text. It has become students' favourite as it provides the latest theories, thoughts and applications on the subject with timely revisions to stay up to date all the time. Since its first edition, it has provided complete, comprehensive and authentic text on micro and macro aspects of managerial economics. It has now been revised thoroughly with added interpretations of economic theories and concepts and their application to managerial decisions. *Engineering Economics Text & Cases | 20+ Real World Cases | 3e* D N Dwivedi, Dr H L Bhatia & Dr S N Maheshwari, This book provides guidance to the administrative personnel on how economic principles and theories can be applied to ensure the most efficient performance of their engineering functions. The engineering function involves the activities and works of designing and constructing machinery, engines, electrical devices and roads and bridges. The performance of all these activities involves financial, human and time costs and yields benefits to the performers of these activities and to the society as a whole. A comprehensive analysis of how economic concepts and economic theories can be applied to resolve the economic problems confronted by the people as consumers, producers, factor owners and marketers has been provided in the first edition of this book. In this new edition, some important contributions have been made to the subject matter of the Engineering Economics to make its scope more comprehensive. Primarily, a new Part i.e. Part V has been added to this revised edition containing two new chapters: Ch 21 Cash Flows, Investment and Equivalence and Ch 22 Time Value of Money. The purpose of Ch 21 is to analyse how cash flows and investments made by the business firms affect the economy and create opportunities for further investments. And Ch 22 highlights the reasons for change in the value of money and its effects on business transactions. The second important contribution to this revised edition is the addition of twelve Case

Studies to economic theories of the relevant chapters The objective of adding Case Studies to the book is to illustrate how economic theories can be and are applied to test their theoretical validity and to test the efficacy of managerial decisions Incidentally the Case Studies have been provided by some reputed academic faculties In addition in the revision of the book some additional interpretations have been added to the explanation of economic theories presented in different chapters In Ch 30 the analysis of the monetary policy has been almost rewritten with additional proofs Also the data given in different Chapters to show the periodic economic changes have been updated Besides some extra questions have been added to the Review Questions of some chapters
