Mathematics Their Way Cynthia Garland,1990

Encyclopedia of Early Childhood Education Doris Pronin

Fromberg,Leslie R. Williams,2012-05-23 This Encyclopedia is a reference work about young children in the USA designed for use by policy makers community planners parents of young children teacher and early childhood educators programme and school administrators among others The field of early childhood education has been affected by changes taking place in the nation s economy demographics schools communities and families that influence political and professional decisions These diverse historical political economic socio cultural intellectual and educational influences on early childhood education have hindered the development of a clear definition of the field The Encyclopedia provides an opportunity to define the field against the background of these influences and relates the field of early childhood education to its diverse contexts and to the cultural and technological resources currently affecting it

Mathematics Their Way Mary Baratta-Lorton,1994-05 The most popular activity centered math curriculum in use today Contains over 200 innovative math experiments Revised sourcebook also features an index keying the sourcebook and summary newsletter

Integrative Framing Analysis Viorela Dan,2017-09-13 Much of framing scholarship focuses either exclusively on the

analysis of words or of visuals This book aims to address this gap by proposing a six step approach to the analysis of verbal frames visual frames and the interplay between them an integrative framing analysis This approach is then demonstrated through a study investigating the way words and visuals are used to frame people living with HIV AIDS in various communication contexts the news public service announcements and special interest publications This application of integrative framing analysis reveals differences between verbal frames and visual frames in the same messages underscoring the importance of looking at these frames together The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Breaking Images Brian Greer, David Kollosche, Ole Skovsmose, 2024-12-11 Mathematics is an activity something we do not just something inert that we study This rich collection begins from that premise to explore the various social influences institutional forces and lived realities that shape and mould the study and practice of mathematics and are moulded by it in turn These twenty one essays explore questions of mathematics as a topic of philosophy but also the nature and purpose of mathematics education and the role of mathematics in moulding citizens It challenges the biases and prejudices inherent within uninformed histories of mathematics including problems of white supremacy the denial of cultural difference and the global homogenization of teaching methods In particular the book contrasts the effectiveness of mathematics and science in modelling physical phenomena and solving technical problems with its ineffectiveness in modelling social phenomena and solving human problems and urges us to consider how mathematics might better meet the urgent crises of our age The book addresses anybody who is interested in reflecting on the role of mathematics in society from different perspectives It allows mathematicians to ponder about the cultural connections of mathematics and provides new perspectives for philosophical sociological and cultural studies of mathematics Because of the book's emphasis on education in mathematics it is especially interesting for mathematics teachers and teacher educators to challenge their understanding of the subject
