Functional Programming, Glasgow 1994 Kevin Hammond,David N.

Turner,Patrick M. Sansom,2013-03-09 This is the proceedings of the seventh annual workshop held by the Glasgow Functional Programming Group The purpose of the workshop is to provide a focus for new research to foster research contacts with other functional language researchers and to provide a platform for research students to develop their presentation skills As in previous years we spent three days closeted together in a pleasant seaside town isolated from normal work commitments We were joined by colleagues from other universities both UK and abroad and from industry Workshop participants presented a short talk about their current research work and produced a paper which appeared in a draft proceedings These papers were then reviewed and revised in the light of discussions at the workshop and the referees comments A selection of those revised papers the majority of those presented at the workshop appears here in the published

proceedings The papers themselves cover a wide span from theoretical work on algebras and bisimilarity to experience with a real world medical application Unsurprisingly given Glasgow's track record there is a strong emphasis on compilation techniques and optimisations and there are also several papers on concurrency and parallelism
