Matter and Mathematics Andrew Younan,2022-11-11 To borrow a phrase from Galileo What does it mean that the story of the creation is written in the language of mathematics This book is an attempt to understand the natural world its consistency and the ontology of what we call laws of nature with a special focus on their mathematical expression It does this by arguing in favor of the Essentialist interpretation over that of the Humean and Anti Humean accounts It re examines and critiques Descartes notion of laws of nature following from God s activity in the world as mover of extended bodies as well as Hume s arguments against causality and induction It then presents an Aristotelian Thomistic account of laws of nature based on mathematical abstraction necessity and teleology finally offering a definition for laws of nature within this framework

The Who's Who of Nobel Prize Winners, 1901-2000 Louise S. Sherby, 2001-12-30 The Who's Who of Nobel Prize Winners is a one stop source of detailed information on the men and women who earned the Nobel Prize during the 20th century Organized chronologically by prize each extensive article contains in depth information on the laureate's life and career as well as a selected list of his or her publications and biographical resources on the individual A concise commentary explains why the laureate received the award and summarizes the individual's other important achievements This completely updated edition also contains a history of the prize Four indexes distinguish this title from similar biographical references and enable researchers to search by name education nationality or citizenship and religion *Creation* Hans Schwarz, 2002-10-22 Schwarz first surveys scientific explanations for the origins of the universe and of life and discusses the scientific understanding of matter space time and determinism He then reviews the history of Christian responses to science's discoveries including a summary of reactions from Christian scientists He completes his analysis with a proposal for the development of a Christian understanding of creation BOOK JACKET *Revival: Philosophy and the Physicists (1937)* Lizzie Susan Stebbing, 2018-05-08 This book is written by a philosopher for other philosophers and for that section of the reading public who buy in large quantities and no doubt devour with great earnestness the popular books written by scientists for their enlightenment We common readers to adapt a phrase from Samuel Johnson are fitted neither to criticize physical theories nor to decide what precisely are their implications We are dependent upon the scientists for an exposition of those developments which so we find them proclaiming have important and far reaching consequences for philosophy Unfortunately however our popular expositors do not always serve us very well The two who are most widely read in this country are Sir Arthur Eddington and Sir James Jeans They are not always reliable guides Their influence has been considerable upon the reading public upon theologians and upon preachers they have even misled philosopher who should have known better Accordingly it has seemed to me to be worth while to examine in some detail the philosophical views that they have put forth and to criticize the grounds upon which these views are based *Report India (Dominion)*.
