**The Regulation of**

**Financial Planning in Australia** Angelique Nadia Sweetman McInnes, 2019-08-20 This book investigates the legitimacy of the current Australian Financial Services Licensee Authorised Representative AFSL AR licensing model as specified in the Commonwealth Corporations Act 2001. The book rectifies the deficiency in scholarly attention to this matter by developing a new conceptualised framework for the financial planning discipline. It takes into account theories in agency legislation, legitimacy and the independent individual regulatory regimes in other professions thereafter integrating this framework with the financial planning theory to examine the legitimacy or what was found to be the illegitimacy of licensing advisers via multiple third party conflicted commercially oriented licensees. This book makes a very useful reference to understanding financial planning licencing model in Australia.
