

METROPOLITAN PROBLEMS

Racism, Poverty, Crime, Housing, and Fiscal Crisis

Until recently, urban problems were city problems. That is no longer the case as the issues once associated with the large, compact settlement form have spread out, like the metropolitan population and its economic activities, to characterize the entire urban region. In the late 1960s and 1970s, especially during President Johnson's Great Society, urban problems were defined almost exclusively as those involving racial segregation, poverty, violent crime, and drugs. Now, in the first decade of the twenty-first century, poverty, unemployment, foreclosures, and homelessness, as well as the severe economic recession itself, are particular issues of concern. As the attention of the federal government in Washington, D.C., focuses on the major issues of the economy and health care, the nation's state governments seem to be ignored. Consequently, adding to our other urban ills, we currently face more intense fiscal crises and their impact on local public services and infrastructure.

Was there ever a baseline in America against which the problems of today can be measured? As in the other industrialized capitalist countries of Europe, the quality of urban life with the advent of capitalism in the 1800s was severe for all but the wealthy. Early photographic images of American cities at the turn of the last century feature overcrowding; immense traffic jams of primitive Model-T automobiles mixed in with horse-drawn carts, tenements teeming with immigrants, and crowds of children swarming across city streets. Until after World War II, city life in the United States was plagued by frequent public health crises such as cholera outbreaks, high infant mortality rates, alcoholism, domestic violence, street gang activity, and crime. For much of our history, then, city life has been virtually synonymous with social problems. Yet we know now that these same problems—crime, disease, family breakup—are experienced everywhere.

The sociologists of the early Chicago School, in the 1920s and 1930s, believed that the move to the city was accompanied by social disorganization. While subsequent research showed that this perception was inaccurate, people in the United States still rank small and middle-size cities or suburbs as providing the highest quality of life and
