Richard Baxell, 2012-09-06 When a Nationalist military uprising was launched in Spain in July 1936 the Spanish Republic's desperate pleas for assistance from the leaders of Britain and France fell on deaf ears. Appalled at the prospect of another European democracy succumbing to fascism, volunteers from across the Continent and beyond flocked to Spain's aid; many to join the International Brigades. More than 2,500 of these men and women came from Britain, Ireland, and the Commonwealth, and contrary to popular myth, theirs was not an army of adventurers, poets, and public school idealists. Overwhelmingly, they hailed from modest working-class backgrounds, leaving behind their livelihoods and their families to fight in a brutal civil war on foreign soil. Some 500 of them never returned home. In this inspiring and moving oral history, Richard Baxell weaves together a diverse array of testimony to tell the remarkable story of the Britons who took up arms against General Franco. Drawing on his own extensive interviews with survivors, research in archives across Britain, Spain, and Russia, as well as first-hand accounts by writers both famous and unknown, *Unlikely Warriors* presents a startling new interpretation of the Spanish Civil War and follows a band of ordinary men and women who made an extraordinary choice. *The Making of Israeli Militarism* Uri Ben-Eliezer, 1998-06-22 an original interpretation of the wide-ranging impact of the military on Israeli society, one of the most insightful works on Israeli society in general. Gershon Shafir. From the early days of the Yishuv, militarism and the military have become a way of life for Israelis. Focusing on the period between 1936 and 1956, Uri Ben-Eliezer traces the ways in which military force acquired legitimacy in civilian society and how the use of organized violence became an acceptable solution to conflicts, especially the Arab-Israeli conflict. *Advances in Computational Intelligence* Ignacio Rojas, Gonzalo Joya, Andreu Catala, 2017-06-04 This two-volume set LNCS 10305 and LNCS 10306 constitutes the refereed proceedings of the 14th International Work Conference on Artificial Neural Networks IWANN 2017 held in Cadiz, Spain, in June 2017. The 126 revised full papers presented in this double volume were carefully reviewed and selected from 199 submissions. The papers are organized in topical sections on Bio-inspired Computing, E-Health and Computational Biology, Human-Computer Interaction, Image and Signal Processing, Mathematics for Neural Networks, Self-organizing Networks, Spiking Neurons, Artificial Neural Networks in Industry, ANNI-17, Computational Intelligence Tools and Techniques for Biomedical Applications, Assistive Rehabilitation Technology, Computational Intelligence Methods for Time Series, Machine Learning Applied to Vision and Robotics, Human Activity Recognition for Health and Well-Being Applications, Software Testing and Intelligent Systems, Real-World Applications of BCI Systems, Machine Learning in Imbalanced Domains, Surveillance and Rescue Systems and Algorithms for Unmanned Aerial Vehicles, End-User Development for Social Robotics, Artificial Intelligence and Games, and Supervised, Non-Supervised, Reinforcement, and Statistical Algorithms.
