Modern Psychoanalysis New Directions Perspectives:

Modern Psychoanalysis, 2017 Modern Psychoanalysis is a definitive exploration of the expanding horizons of this still controversial approach to and treatment of human behavior. In the first paperback release of a work sponsored by the American Academy of Psychoanalysis, thirty-five authorities explore new approaches to psychoanalytic theory and therapy and examine the growing interaction between this field and the other social and behavioral sciences. Modern Psychoanalysis demonstrates how some of the leading figures are bringing their discipline into the mainstream of biological and social through making use of systems theory, information processing, the constructs of adaptation and learning, and other new tools and findings. The book is unusually free of the jargon that has separated psychoanalysis in the past from the rest of behavioral and social science. Some of the authors and their subjects are Roy Grinker, Conceptual Progress in Analysis, Jin-Gen Ruesch, Psychoanalysis between Two Cultures, Edward Tauber, Dreaming and Modern Dream Theory, Jules Masserman, The Biodynamic Roots of Psychoanalysis, Lewis H. Wolberg, Short-term Psychotherapy, Stuart M. Finch, and Albert Cain, Psychoanalysis of Children, Morris Parloff, Analytic Group Psychotherapy, Salvador Minuchin, The Low Socioeconomic Population, Leonard Duhl, and Robert Leopold, Psychoanalysis and Social Agencies, Leon Edel, Psychoanalysis and the Creative Arts, Arnold A. Rogow, Psychiatry: History and Political Science, and John R. Seeley, Psychiatry: Revolution, Reform, and Reaction. The volume is prepared with the rigor and comprehensiveness that should make the book a standard handbook for psychiatrists, psychologists, and behavioral scientists. And it is written with a sense of curiosity for readers who may simply be interested in the basic stances of this controversial field of theory and practice. It has earned sufficient plaudits to be called a classic in the field. Judd Marmor's new introduction gives added weight to such claims. Provided by publisher.

T. S. Eliot and the Dynamic Imagination Sarah Kennedy, 2018-04-05 How is a poem made From what constellation of inner and outer worlds does it issue forth Sarah Kennedy's study of Eliot's poetics seeks out those images most striking in their resonance and recurrence the sea change the light invisible and the dark ghost She makes the case for these sustained metaphors as constitutive of the poet's imagination and art Eliot was haunted by recurrence His work is full of moments of luminous recognitions moments in which a writer discovers both subject and appropriate image This book examines such moments of recognition and invocation by reference to three clusters of imagery drawing on the contemporary languages of literary

criticism psychology physics and anthropology Eliot's transposition of these registers at turns wary and beguiled interweaves modern understandings of originary processes in the human and natural world with a poet's preoccupation with language The metaphors arising from these intersections generate the imaginative logic of Eliot's poetry **Psychiatry in Transition**

John Lofland, 2021-09-28 When the first edition of Psychiatry in Transition came out Dr Gene Usdin wrote that to read Marmor's papers is to read not only psychiatric history but also where that history will be in the next decade That next decade has happened and Marmor's papers remain a beacon of professional endeavor This second edition includes a final chapter on Short Term Dynamic Psychotherapy in which the historical background of brief psychotherapy focusing on the contributions of Freud Ferenczi Rand and Alexander is examined and synthesized Throughout certain basic themes stand out First is the necessity for building upon a solid foundation of scientific thought coupled with a readiness to change theories that do not fit with established facts Second Marmor offers a systems theory to replace simplistic unitary or linear theories Third he presents some common denominators for illuminating the divergent views that characterize contemporary psychiatric theory and practice The whole is linked by a deep concern with betterment of the human predicament Marmor demonstrates that causation in psychiatry can be optimally understood in terms of multiple interacting variables rather than as a response to unitary factors He foreshadows and predicts developments that are now current in contemporary psychiatric practice such as the relationship between neurochemistry and behavior and group therapy with dynamic psychotherapy He also deals with the importance of cultural and socioeconomic factors in individual personality development The work concludes with a series of chapters on interethnic hostility nationalism and urban violence Marmor's work clarifies the nature of the psychoanalytic process by liberating it from obscurantism and jargon This book points the way toward unraveling some of the cognitive dissonance in this area As Leon Eisenberg observed this is an admirable vade mecum of dynamic psychiatry both for residents in training and clinicians in practice Learning the Language of Addiction
