Ballano,2024-04-30 Does the current celibate semi monastic and all male seminary formation contribute to the persistence of clerical sexual abuse in the Roman Catholic Church Applying sociological theories on socialization total institutions and social resistance as the primary conceptual framework and drawing on secondary literature media reports the author s experience interviews and Church documents this book argues that the Catholic Church s institution of the celibate seminary formation as the only mode of clerical training for Catholic priests has resulted in negative unintended consequences to human formation such as the suspension of normal human socialization in society psychosexual immaturity and weak social control against clerical sexual abuse The author thus contends that celibate training while suitable for those who do live in religious or monastic communities is inappropriate for those who are obliged to live alone and work in parishes As such an alternative model for diocesan clerical formation is advanced A fresh look at the aptness and effects of celibate formation for diocesan clergy this volume is the first to relate the persistence of Catholic clerical sexual abuse to celibate seminary formation exploring the structural links between the two using sociological arguments and proposing an apprenticeship based model of formation which has numerous advantages as a form of clerical training It will therefore appeal to scholars and students of religion sociology and theology as well as those involved with seminary formation The History Teacher ,1977 *The New Era* ,1978 **Congressional Record** United States. Antiliberal Internationalism in the Twentieth Century Matthijs Lok,Marjet Brolsma,Robin de Bruin,Stefan Couperus,Rachel McElroy White,2025-05-21 This book shows how antiliberal discourse thought and mobilization have in defiance of nationalist aims been significantly shaped and determined in the international sphere as new collaborations

position themselves against the liberal order established after the fall of the Berlin Wall. Despite often drawing inspiration from nationalist movements and ideologies, antiliberalism is a phenomenon that transcends domestic contexts and settings in important ways. This collection of essays charts the many-sided aspects of twentieth-century internationalism and its contemporary developments across the globe. Without excluding well-known European sources of antiliberal internationalism, it decentres the European experience by exploring specific case studies from South and East Asia, the Middle East, the Americas, Africa, and Oceania. Moreover, the volume abundantly demonstrates that liberalism and anti-liberalism cannot be considered as fixed entities; as anti-liberalism was and is as much defined by its enemies as by its advocates. This book is intended for scholars and students of International Studies, Intellectual History, Political History, Political Science, European Studies, and Global Studies, as well as for journalists and policymakers interested in contemporary Europe, cosmopolitanism, political polarization, and the traditions of the right and far right.
