Copyright Office, 1968 Includes Part 1 Number 1 Books and Pamphlets Including Serials and Contributions to Periodicals January June *The Bonus Army* Paul Dickson, Thomas B. Allen, 2020-10-14 Based on extensive research this highly praised history recounts the 1932 march on Washington by 15 000 World War I veterans and the protest's role in the transformation of American society Recommended Library Journal *Science, Politics And The Pharmaceutical Industry* John Abraham, 0 John Abraham University of Reading., 2023-05-31 Drug disasters from Thalidomide to Oprelvekin and other less dramatic cases of drug injury raise questions about whether the testing and control of medicines provides satisfactory protection for the public In this revealing study John Abraham develops a theoretically challenging realist approach in order to probe deeply into the work of scientists in the pharmaceutical industry and governmental drug regulatory authorities on both sides of the Atlantic Through the examination of contemporary controversial case studies he exposes how the commercial interest of drug manufacturers are consistently given the benefit of the scientific doubts about medicine safety and effectiveness over and above the best interests of patients A highly original combination of philosophical rigour historical sensitivity and empirical depth enables the black box of industrial and government science to be opened up to critical scrutiny much more than in previous social scientific study All major aspects of drug testing and regulation are considered including pre clinical animal tests clinical trials and postmarketing surveillance of adverse drug reactions The author argues that drug regulators are too dependent on pharmaceutical industry resources and expertise and too divorced from public accountability The problem of corporate bias is particularly severe in the UK where regulatory decisions about medicine safety are shrouded in greater secrecy than in the US Since the purpose of drug regulation should be to maximize the safety and effectiveness of medicines for patients the public needs and deserves policies to counteract corporate bias in drug testing and evaluation John Abraham's realist analysis provides a robust basis for policy interventions at the institutional and legislative levels He proposes that corporate bias could be reduced by more extensive freedom of information greater autonomy of government scientists from pharmaceutical industry the development of independent drug testing by the regulatory authority increased patient representation on regulatory committees and more frequent and thorough oversight of regulatory performance by the legislature This book should be of interest to anyone who cares about how medicines should be controlled in modern society It should prove particularly rewarding for students and researchers in the sociology of science and technology science and medicines policy medical sociologists the medical and pharmaceutical professions and consumer organizations **The New Deal at Home and Abroad, 1929-1945** Clarke A. Chambers, 1965 *Storm of the Century* Willie Drye, 2019-08-01 In 1934 hundreds of jobless World War I veterans were sent to the remote Florida Keys to build a highway from Miami to Key West The Roosevelt Administration was making a genuine effort to help these down and out vets many of whom suffered from what

is known today as post traumatic stress disorder But the attempt to help them turned into a tragedy The supervisors in charge of the veterans misunderstood the danger posed by hurricanes in the low lying Florida Keys In late August 1935 a small stealthy tropical storm crossed the Bahamas causing little damage When it entered the Straits of Florida however it exploded into one of the most powerful hurricanes on record But US Weather Bureau forecasters could only guess at its exact position and their calculations were well off the mark The hurricane that struck the Upper Florida Keys on the evening of September 2 1935 is still the most powerful hurricane to make landfall in the US Supervisors waited too long to call for an evacuation train from Miami to move the vets out of harm s way The train was slammed by the storm surge soon after it reached Islamorada Only the 160 ton locomotive was left upright on the tracks About 400 veterans were left unprotected in flimsy work camps Around 260 of them were killed This is their story with newly discovered photos and stories of some of the heroes of the Labor Day 1935 calamity

**Eugene Kinckle Jones** Felix L. Armfield, 2011-02-14 A leading African American intellectual Eugene Kinckle Jones 1885 1954 was instrumental in professionalizing black social work in America Jones used his position as executive secretary of the National Urban League to work with social reformers advocating on behalf of African Americans and against racial discrimination He also led the Urban League s efforts at campaigning for equal hiring practices and the inclusion of black workers in labor unions and promoted the importance of vocational training and social work Drawing on interviews with Jones s colleagues and associates as well as recently opened family and Urban League archives Felix L. Armfield blends biography with an in depth discussion of the roles of black institutions and organizations The result is a work that offers new details on the growth of African American communities the evolution of African American life and the role of black social workers in the years before the civil rights era

**Fracture** Philipp Blom, 2015-04-14 When the Great War ended in 1918 the West was broken Religious faith patriotism and the belief in human progress had all been

called into question by the mass carnage experienced by both sides. Shell shocked and traumatized, the West faced a world it no longer recognized. The old order had collapsed, replaced by an age of machines. The world hurtled forward on gears and crankshafts, and terrifying new ideologies arose from the wreckage of past belief. In *Fracture*, critically acclaimed historian Philipp Blom argues that in the aftermath of World War I, citizens of the West directed their energies inwards, launching into hedonistic, aesthetic, and intellectual adventures of self-discovery. It was a period of both bitter disillusionment and visionary progress. From Surrealism to Oswald Spengler's *The Decline of the West*, from Fritz Lang's *Metropolis* to theoretical physics, and from Art Deco to Jazz and the Charleston dance, artists, scientists, and philosophers grappled with the question of how to live and what to believe in a broken age. Morbid symptoms emerged simultaneously from the decay of World War I: progress and innovation were everywhere met with increasing racism and xenophobia. America closed its borders to European refugees and turned away from the desperate poverty caused by the Great Depression. On both sides of the Atlantic, disenchanted voters flocked to Communism and fascism, forming political parties based on violence and revenge that presaged the horror of a new World War. Vividly recreating this era of unparalleled ambition, artistry, and innovation, Blom captures the seismic shifts that defined the interwar period and continue to shape our world today. **Why We Fight** Nancy Beck Young, 2013-04-05. History tells us that World War II united Americans, but as in other conflicts, it was soon back to politics as usual. Nancy Beck Young argues that the illusion of cooperative congressional behavior actually masked internecine party warfare over the New Deal. Young takes a close look at Congress during the most consensual war in American history to show how its members fought intense battles over issues ranging from economic regulation to social policies. Her book highlights the extent of and reasons for liberal successes and failures while challenging assumptions that conservatives had gained control of legislative politics by the early 1940s. It focuses on the role of moderates in modern American politics, arguing that they, not conservatives, determined the outcomes in key policy debates and also established the methods for liberal reform that would dominate national politics until the early 1970s. *Why We Fight*, which refers as much to the conflicts between lawmakers as to war propaganda films of Frank Capra, unravels the tangle of congressional politics, governance, and policy formation in what was the defining decade of the twentieth century. It demonstrates the fragility of wartime liberalism, the nuances of partisanship, and the reasons for a bifurcated record on economic and social justice policy, revealing difficulties in passing necessary wartime measures while exposing racial conservatism too powerful for the moderate liberal coalition to overcome. Young shows that scaling back on certain domestic reforms was an essential compromise liberals and moderates made in order to institutionalize the New Deal economic order. Some programs were rejected, including the Civilian Conservation Corps, the National Youth Administration, and the Works Progress Administration, while others like the Wagner Act and economic

regulation were institutionalized But on other issues such as refugee policy racial discrimination and hunting communist spies the discord proved insurmountable This wartime political dynamic established the dominant patterns for national politics through the remainder of the century Impeccably researched Young s study shows that we cannot fully appreciate the nuances of American politics after World War II without careful explication of how the legislative branch redefined the New Deal in the decade following its creation

[America Rising](#) David Felix,2011-12-31 The United States became a great power in the last quarter of the nineteenth century and a superpower during World War II without quite knowing it Few Americans fully appreciate the fact today How many people know that in recent years we have had 250 000 troops in 700 bases around the world Consider our recent history of military operations in the Caribbean East Asia the Far East Middle East Southeast Asia Africa and the Balkans In *America Rising* David Felix attempts to explain how and why America became a superpower by examining the political and economic factors that have driven its ascendance and their relationship throughout history Felix begins with the dawn of America showing how America amassed wealth and political power from the start through wars assertions of economic might and the creation of a cultural and philosophical base The nation began with a political order derived from our British origins which enabled our pragmatic culture to take advantage of the vast wealth of a near virgin continent Political and economic freedom were paired authority yielding to both freedoms Our farmers and businessmen were dreamers manufacturing realities out of those dreams Felix s account then makes a point of neoclassical economics as an anvil on which to hammer out a sharper sense of the content of our existence This book which demonstrates the author s zest for historical analysis and great story telling ability points to the central fact of a rising America the intensely energizing interaction between polity and economy The United States is the greatest power in world history but the rise of another great power China is beginning to be increasingly apparent One trusts that drawing upon its deep resources America will remember its history and traditions and continue as a superpower

*Australia's Boldest Experiment* Stuart Macintyre,2015-06-01 In this landmark book Stuart Macintyre explains how a country traumatised by World War I hammered by the Depression and overstretched by World War II became a prosperous successful and growing society by the 1950s An extraordinary group of individuals notably John Curtin Ben Chifley Nugget Coombs John Dedman and Robert Menzies re made the country planning its reconstruction against a background of wartime sacrifice and austerity The other part of this triumphant story shows Australia on the world stage seeking to fashion a new world order that would bring peace and prosperity This book shows the 1940s to be a pivotal decade in Australia At the height of his powers Macintyre reminds us that key components of the society we take for granted work welfare health education immigration housing are

not the result of military endeavour but policy planning politics and popular resolve
