N. McCloskey, 2013-10-16 The essays in this book focus on the controversies concerning Britain's economic performance between the mid nineteenth century and the First World War The overriding theme is that Britain's own resources were consistently more productive more resilient and more successful than is normally assumed And if the economy's achievement was considerable the influence on it of external factors trade international competition policy were much less significant than is normally supposed The book is structured as follows Part One The Method of Historical Economics Part Two Enterprise in Late Victorian Britain Part Three Britain in the World Economy 1846 1913 *Cliometrics as Economics Imperialism: Across the Watershed* Benjamin Fine, 2023-11-27 In Cliometrics as Economics Imperialism Ben Fine traces the cliometric revolution from before its emergence through three phases of the new the newer and the newest economic history These phases are shown to correspond to those of economics imperialism the colonisation of topics and fields by mainstream economics moving successively through as if there were perfectly working markets as if imperfectly working markets and these combined plus arbitrary inclusion of other variables The text draws upon case studies for example of the putative eighteenth century consumer revolution Douglass North path dependence and the British coal industry and through exposing the reduction of economic theory and economic history deployed within them and giving rise to a corresponding reduction in the presence of the social the historical and political economy Slavery and Historical Capitalism during the Nineteenth Century Dale Tomich, 2017-10-16 This book examines the historiography of nineteenth century slavery from the perspective of the second slavery The concept of the second slavery emphasizes the relationship between local histories and world economic transformations It breaks with conventional narratives of slavery by emphasizing

the expansion of reconfigured slaveries in extensive new zones of commodity production in Brazil Cuba and the US South as part of world economic processes of decolonization industrialization urbanization and the creation of mass markets Thus slavery was not a moribund institution Capitalist modernity liberal ideology and anti slavery from above or from below faced a vigorous foe that operated within the very economic political and cultural premises of the changing 19th century world This perspective offers an original approach to the history of slavery It has opened up vigorous debates over slavery and anti slavery Atlantic history and capitalism An international group of scholars critically engage older traditions of scholarship on Atlantic history the economic history of slavery and the history of slavery in Cuba Brazil and the United States from the perspective of the second slavery Each chapter reinterprets its subject matter in a way that opens out to dialogue between national historiographies and to a reformulation of Atlantic and world economic history This collection of essays contributes to the development of a more productive conceptual framework for the reconstruction and reinterpretation of the historical relation of slavery and world capitalism during the nineteenth century

On the Reliability of Economic Models Daniel Little, 2012-12-06 This volume represents a contribution to the philosophy of economics with a distinctive point of view the contributors have selected particular areas of economics and have probed these areas for the philosophical and methodological issues that they raise The primary essays are written by philosophers concentrating on philosophical issues that arise at the level of the everyday theoretical practice of working economists Commentary essays are provided by working economists responding to the philosophical arguments from the standpoint of their own disciplines The volume thus represents something of an experiment in the philosophy of science striving as it does to explore methodological issues across two research communities The purpose of the volume is very specific to stimulate a discussion of the epistemology and methodology of economics that works at the level of detail of existing best practice in economics today The contributors have designed their contributions to stimulate productive conversation between philosophers and economists on topics in the methodology of economics

Transformational Growth and the Business Cycle Edward Nell, 2005-09-27 This book examines the concept of Transformational Growth from a number of different historical and geographical perspectives Transformational Growth sees the economy as an evolving system in which the market selects and finances innovations changing the character of costs and affecting the pattern of market adjustment This creates the possibility that markets will work differently in particular historical periods This book explores market adjustments in two distinct historical periods 1870 1914 and 1945 the present The book focuses on six countries USA United Kingdom Canada Germany Japan and Argentina In all cases the earlier period dominated by craft based technologies proves to be the one in which markets adjust through a weakly stabilising price mechanism By contrast in the later period in all cases with the exception of Argentina there is no evidence of such a price mechanism but in its place can be seen a multiplier accelerator process which arguably reflects a change of technology to mass production

Ramírez Pérez, 2012 The main purpose of the book is to introduce the work of Alan S Milward and to acknowledge the full magnitude of his scientific contribution to contemporary British and European history The book is a collection of essays which provide a better understanding of Alan Milward's extensive intellectual work for future scholars and facilitate the knowledge and transmission of his published work to present and future generations of students scholars in the various disciplines concerned and the general public The series of original contributions which this book contains are related to or reflect critically upon Milward's own contributions to the fields of political diplomatic and socio economic history political science economics international relations and European Studies in general This book honors Alan Milward through a better understanding of his many pioneering contributions in the fields of contemporary European history in general and the history of European integration in particular Although the volume does not aim to be a substitute for Milward's work itself it illuminates and assesses his creative process along fifty years of continued and intense work as well as the impact of his main work and the continuing relevance of his main theses today
