Modern Architecture and Climate Daniel A. Barber, 2020-07-07 How climate influenced the design strategies of modernist architects Modern Architecture and Climate explores how leading architects of the twentieth century incorporated climate mediating strategies into their designs and shows how regional approaches to climate adaptability were essential to the development of modern architecture Focusing on the period surrounding World War II before fossil fuel powered air conditioning became widely available Daniel Barber brings to light a vibrant and dynamic architectural discussion involving design materials and shading systems as means of interior climate control He looks at projects by well known architects such as Richard Neutra Le Corbusier Lcio Costa Mies van der Rohe and Skidmore Owings and Merrill and the work of climate focused architects such as MMM Roberto Olgyay and Olgyay and Cliff May Drawing on the editorial projects of James Marston Fitch Elizabeth Gordon and others he demonstrates how images and diagrams produced by architects helped conceptualize climate knowledge alongside the work of meteorologists physicists engineers and social scientists Barber describes how this novel type of environmental media catalyzed new ways of thinking about climate and architectural design Extensively illustrated with archival material Modern Architecture and Climate provides global perspectives on modern architecture and its evolving relationship with a changing climate showcasing designs from Latin America Europe the United States the Middle East and Africa This timely and important book reconciles the cultural dynamism of architecture with the material realities of ever increasing carbon emissions from the mechanical cooling systems of buildings and offers a historical foundation for today's zero carbon design

Future Nature W.M. Adams, 2004-04-26 The countryside is changing faster than ever Fifty years of conservation achievements in the UK are now being confronted by a new complexion of economic forces that are driving change in the countryside At the same time new ideas in conservation are altering the role that conservation is being asked to play in negotiating the transition from past to future This revised edition of Bill Adams classic work Future Nature tackles the new challenges in the countryside and wildlife conservation head on through a new Introduction and Postscript with updated arguments about naturalness and our social engagement with nature and complemented by a new Foreword by Adrian Phillips Concepts such as biodiversity and sustainability and changes in our understanding appreciation and concern for nature offer unprecedented opportunities Bill Adams explores the scientific cultural and economic significance of conservation He argues that conservation must move

beyond the boundaries of parks and reserves to embrace the whole countryside The importance of conservation for the future is enormous It holds the potential to create new spaces for nature both in the landscape and in our lives and imaginations This factual beautifully written and thought provoking book offers a fundamental reassessment of conservation its importance and how to achieve it Published with BANC The Fourth Wave Herman Maynard, Susan E. Mehrtens, 1996-08-31 Applying the concept of historical waves originally propounded by Alvin Toffler in *The Third Wave* Herman Maynard and Susan Mehrtens look toward the next century and foresee a fourth wave an era of integration and responsibility far beyond Toffler's revolutionary description of third wave postindustrial society Whether we attain this stage of global well being however will depend on how well our business institutions adapt and change The Fourth Wave examines the ways business has changed in the second and third waves and must continue to change in the fourth The changes concern the basics how an institution is organized how it defines wealth how it relates to surrounding communities how it responds to environmental needs and how it takes part in the political process Maynard and Mehrtens foresee a radically different future in which business principles concern for the environment personal integrity and spiritual values are integrated The authors also demonstrate the need for a new kind of leadership managers and CEOs who embrace an attitude of global stewardship who define their assets as ideas information creativity and vision and who strive for seamless boundaries between work and private lives for all employees
