New Horizons for Cultural Resources Data Management and Analyses

F. Kirk Halford  and Dayna M. Ables

ABSTRACT

Despite making great strides over the past 50 years, cultural resources data management and synthesis continues to be elusive and nonstandardized, with each state and agency developing disparate systems that do not easily mesh. The Bureau of Land Management (BLM) has embarked on a national initiative by creating a National Cultural Resources Data Standard (NCRDS) that works to address many long-standing data organization issues. The NCRDS allows for the application of more rigorous data management principles that facilitate landscape-level planning and data modeling on BLM-administered lands across the western United States. The NCRDS and associated National Cultural Resources Information Management System (NCRIMS) contains normalized data from 11 western State Historic Preservation Offices (SHPOs) and BLM data stores. NCRIMS is a web-based application hosted by the BLM's National Operations Center (NOC) Enterprise Geographic Information System (EGIS). NCRIMS allows for high-level planning during local, regional, and multistate project analyses and undertakings, facilitating consideration of cultural heritage values early in the planning process versus late stages as has been traditional. This allows the BLM to more proactively, effectively, and efficiently answer data calls and inform agency decision-makers on possible impacts to cultural heritage resources by proposed or ongoing agency actions.

Pese a los avances de los últimos 50 años, la gestión y síntesis de los datos del patrimonio cultural son complejos ya que cada agencia y Estado utiliza sistemas dispares no-estandarizados que son difíciles de homologar. Dada esta situación, el Bureau of Land Management (BLM) ha desarrollado el National Cultural Resources Data Standard (NCRDS), una iniciativa de nivel nacional que aborda los problemas de organización de macrodatos. El NCRDS aplica rigurosos principios de gestión de datos que facilitan la planificación, a nivel de paisaje y modelos, en las tierras administradas por el BLM en toda la zona oeste de los Estados Unidos. El NCRDS y el National Cultural Resources Information Management System (NCRIMS) asociado, contienen datos normalizados de 11 Estados del oeste (BLM) y de la State Historic Preservation Offices (SHPOs). NCRIMS es una aplicación web auspiciada por el Enterprise Geographic Information System (EGIS) del National Operations Center (NOC) de BLM. NCRIMS permite un alto nivel de planificación durante la ejecución y análisis de proyectos locales, regionales y multi-estatales. Esto facilita la consideración de los valores patrimoniales desde primeras etapas del proceso de planificación, en lugar de que éstos sean evaluados en las etapas finales, como se ha hecho tradicionalmente. BLM puede así responder de manera proactiva, efectiva y eficiente a las consultas de datos. Además, las agencias involucradas pueden ser informadas por la BLM sobre el posible impacto que acciones propuestas o en curso pueden tener sobre el patrimonio cultural.

Large landscape-scale planning efforts, policies (see [Secretarial Orders \(SO\)](#) 3330 and 3336, and interstate undertakings have brought to the forefront the need for effective and efficient ways to manage and analyze spatial information on archaeological and historic sites for cultural resources management (CRM). Over the past several years, more calls for landscape-level approaches to

analyzing the past have been promoted (Altschul 2016; Bureau of Land Management [BLM] 2012; Doelle et al. 2016; Halford 2019; Heinen and Altschul 2019; McManamon et al. 2016; Murtha et al. 2019) versus “site-centric” methods, which have been the historic norm in CRM. Site-centric approaches are due, in part, to the fact that CRM has been caught in a sort of “methodological

New Horizons In Information Management:

Computer Information Systems and Industrial Management Khalid Saeed, Jiří Dvorský, 2024-08-29 This book constitutes the proceedings of the 23rd International Conference on Computer Information Systems and Industrial Management CISIM 2024 held in Białystok Poland during September 27-29, 2024. The 31 full papers presented were carefully reviewed and selected from 47 submissions. These papers focus on biometrics and pattern recognition applications, computer information systems and security, industrial management and other applications, machine learning and artificial neural networks, modelling and optimization. **New Horizons in Management, Leadership and Sustainability** Satinder

Dhiman, Ramanie Samaratunge, 2021-05-17 Drawing upon research and practitioner narratives from management, leadership, organizational studies, entrepreneurship and sustainable business domains, this book explores the many pathways that enable emerging countries to transform knowledge into action to achieve economic and sustainable development. The authors take a holistic approach to transforming knowledge that goes beyond the mere application of knowledge to include the assimilation, adaptation and contextualization of knowledge to suit the unique contexts, needs and conditions existing in emerging countries. They then present success stories and case studies comprising innovative solutions for emerging economies that practitioners can utilize. Current research in management is highlighted by bringing together academics, practitioners, policy makers and interest groups from diverse regions and perspectives. **Geographical Information Systems Theory,**

Management Strydom, Sheryl Kruger, Strydom, Moses, 2018-11-16 The world is witnessing the growth of a global movement facilitated by technology and social media. Fueled by information, this movement contains enormous potential to create more accountable, efficient, responsive and effective governments and businesses, as well as spurring economic growth. **Big Data Governance and Perspectives in Knowledge Management** is a collection of innovative research on the methods and applications of applying robust processes around data and aligning organizations and skillsets around those processes. Highlighting a range of topics including data analytics, prediction analysis and software development, this book is ideally

designed for academicians researchers information science professionals software developers computer engineers graduate level computer science students policymakers and managers seeking current research on the convergence of big data and information governance as two major trends in information management **Water accounting & auditing guidelines**

Batchelor, C., Hoogeveen, J., Faurès, J.M., Peiser, L., Food and Agriculture Organization of the United Nations, 2016-01-01 In many regions of the world sustainable and reliable delivery of water services has become increasingly complex and problematic Complexities that are very likely to increase considering the unprecedented confluence of pressures linked to demographic economic dietary trends and climate change Particularly if overall demand for freshwater exceeds supply the delivery of water services is often less about engineering although engineering is still required and more about politics governance managing and protecting sources resolving conflicts about water ensuring rights to water are respected and so on It is also about understanding and monitoring the hydrological cycle at the appropriate scale of analysis This is where water accounting and auditing can play a crucial role The rationale behind this water accounting and auditing sourcebook is that scope exists worldwide to improve water related sectoral and inter sectoral decision making at local regional and national levels Water accounting and auditing are recommended by FAO and others as being fundamental to initiatives that aim to cope with water scarcity This sourcebook aims to provide practical advice on the application and use of water accounting and auditing helping users planning and implementing processes that best fit their needs *Information*

New Horizons In Information Management Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading New Horizons In Information Management free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading New Horizons In Information Management free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that offer free PDF downloads on a specific topic. While downloading New Horizons In Information

Management free PDF files is convenient, its important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but its essential to be cautious and verify the authenticity of the source before downloading New Horizons In Information Management. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether its classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading New Horizons In Information Management any PDF files. With these platforms, the world of PDF downloads is just a click away.
