New Inequalities The Changing Distribution Of Income And Wealth In The United Kingdom:

New Inequalities John Hills, 1996-05-31 In this book first published in 1996 leading specialists examine wealth distribution developments *The Personal Distribution of Income in an International Perspective* Richard Hauser, Irene Becker, 2012-12-06 Irene Becker and Richard Hauser Bringing Income Distribution in From The Cold was the title Anthony B Atkinson gave his Presidential Address to the Royal Economic Society in 1996 This provocative formulation was intended to draw attention to the way in which the subject of income distribution long has been marginalised in the field of economics Atkinson 1997 In recent years however scientific interest in matters of personal income distribution has been growing One reason for this recent concern stems from the political sphere The factors of reinforced competition between countries due to the globalisation of markets and European integration high unemployment rates and demographic changes necessitate reforms of labour markets tax systems and social security systems These reforms will affect both allocation and distribution so that reliable information on both areas is needed to devise balanced political programs Another reason for the burgeoning literature on personal income distribution is the improved availability of data on individual income which are a major prerequisite for detailed analyses of distribution topics Last but not least the development of powerful computers advanced statistics econometric packages and extended micro simulation models enables researchers both to work with huge individual data sets to describe and explain the personal distribution of income and to simulate the effects of political social and economic programs The volume at hand is based on some of the research advances in this field during the last decade

Handbook of Income Distribution Anthony Barnes Atkinson, François Bourguignon, 2000 **Discourse on Inequality in France and Britain** John Edwards, Jean-Paul Révauger, 2018-10-03 Published in 1998 this volume consists of 16 edited papers presented at an Anglo French conference on inequality in France in March 1997 The purpose of this book is to bring together ideas and perceptions of inequality in the two countries across several areas including multi ethnicity education social work housing and health presented by experts in these fields and in cultural studies The purpose is not comparative in the traditional sense but rather to analyze the different meanings and conceptions that apply to inequality in France and Britain and to demonstrate how these differences affect policies as well as what is considered to be legitimate grounds for policy intervention This approach to social policy in Europe pays attention to the cultural meanings of concepts like inequality and demonstrates that comparative social policy can only be properly productive when it acknowledges that key words like poverty inequality citizenship social rights and insertion exclusion carry with them quite different ideological moral and social meanings in two countries such as Britain and France [Migration and Inequality in Germany, 1870-1913](#) Oliver Grant, 2005 Migration and Inequality in Germany 1870 1913 is a rigorous analysis of migration in Germany within the demographic and socio economic contexts of the period studied Focusing particularly on the rural labour market and the factors affecting it it also examines the pull factor to cities and offers more nuanced interpretations of German

industrialization in the late nineteenth and early twentieth centuries Migration and Inequality in Germany 1870 1913 presents a new view of German history in the late nineteenth century Dr Grant argues that many of the problems of Imperial Germany were

The Future of Social Security Policy Ailsa McKay, 2005-07-25 Current debates concerning the future of social security provision in advanced capitalist states have raised the issue of a citizen's basic income CBI as a possible reform package a proposal based on the principles of individuality universality and unconditionality which would ensure a minimum income guaranteed for all members of society Implementing a CBI would consequently entail radical reform of existing patterns of welfare delivery and would bring into question the institutionalized relationship between work and welfare Ailsa McKay's book makes a unique and positive contribution to the CBI literature by examining the proposal from a feminist economics perspective Gender concerns are central to any debate on the future of social security policy in that state intervention in the field of income redistribution has differential impacts on men and women By drawing attention to the potential a CBI has in promoting equal rights of freedom for men and women this book serves to open up the debate to incorporate a more realistic and inclusive vision of the nature of modern socio economic relationships

Inequality and the State John Hills, 2004-10-28 This book is about inequality how the State affects distribution through its spending programmes and through taxation and what the public thinks of these three issues It describes and analyses one of the biggest social changes in Britain since the Second World War the dramatic widening of the income distribution since the end of the 1970s the growth of poverty and the factors that have driven them And it examines how government social spending and the taxes that pay for it affect this distribution and why they take the forms they do Each part of the discussion is set in the context of public attitudes as revealed by the rigorous and long running British Social Attitudes survey and of Britain's position by comparison with other countries Against this background the book analyses changes in policy since New Labour came to government in 1997 discusses the impacts of these changes and looks at the constraints and pressures on future policies before concluding with a discussion of the dilemmas facing policy makers as they try to meet competing aims in reducing poverty and inequality growing demands on social spending and the constraints and opportunities created by public attitudes

It seeks to explain why inequality is linked to offending behaviour and the evidence underpinning explanations for this and looks in detail at the relationship between offending and anti social behaviour and its management through social policy interventions Crime and Inequality draws upon both criminological and social policy approaches to understand this vital relationship moving beyond criminological approaches which often fail to analyse the way the state attempts to manage poor material circumstance offending and anti social behaviour through social policy The main aims of the book are threefold to draw upon the disciplines of both criminology and social policy to understand the relationship between crime and inequality to provide an in depth analysis of those aspects of social policy that have a bearing on the context management and punishment of offending behaviour to examine government crime and anti social behaviour policies in the context of social security and labour market policies and to identify the tensions that have resulted from attempts to address social justice issues while also making individuals responsible for their actions

Reader's Guide to the Social Sciences Jonathan Michie,2014-02-03 This 2 volume work includes approximately 1 200 entries in A Z order critically reviewing the literature on specific topics from abortion to world systems theory In addition nine major entries cover each of the major disciplines political economy management and business human geography politics sociology law psychology organizational behavior and the history and development of the social sciences in a broader sense

Winners And Losers Chris Hamnett,2005-07-15 First published in 1998 The growth of home ownership since the end of the Second World War marks one of the most fundamental social changes to have taken place in Britain From being a nation of renters at the end of war Britain has been converted into a nation of home owners In 1945 approximately 25% of households in Britain owned their own homes Today the proportion is just over two thirds In the process the proportion of households renting from private landlords has fallen from 65% to about 8% As a result the home ownership market in Britain plays a far more important role today than hitherto both in housing the population and as a potential source of capital gains and losses In addition the home ownership market plays a significant role in the overall health of the economy This is not to deny the importance of social and private rented housing or the major problems of homelessness It is simply to assert that the home ownership market now affects two out of three households in Britain and many more who wish to gain access to it This book is about the dramatic booms and busts of the home ownership market in Britain during the last twenty years and their causes and consequences both for the individuals involved and for the economy as a whole It argues that the home ownership market in Britain particularly in southern Britain where the booms and slumps have been experienced most sharply has been akin to a casino There have been big winners but there have also been big losers The last thirty years have been a roller coaster ride for owners exhilarating but potentially highly dangerous not least for those who fell off or were thrown off in the slump of the early 1990s

Growth, Structural Change and Regional Inequality in Malaysia Asan Ali Golam Hassan,2017-11-30 Economic development in the long run is seen as a process of structural change that is affected by economic growth Malaysia

is one of the middle income economies that are going through rapid structural change Since the mid 1980s it has changed to an industrially based economy with large scale export of electrical and electronic components However thirty years after Malaysia's redistributive policies have been exercised regional inequality still exists This book examines the nature and impact of regional policies in relation to the patterns of demographic and economic structural change and in relation to growth distribution and income disparities across regions in Peninsular Malaysia The book also explores the degree to which differences in regional manufacturing distribution and concentration have contributed to regional inequality It concludes with a number of recommendations for regional policies that will reduce this inequality
