New Directions In Anthropology And Environment Intersections:

New Directions in Anthropology and Environment Carole L. Crumley, 2002-05-09 Carole L. Crumley has brought together top scholars from across anthropology in a benchmark volume that displays the range of exciting new work on the complex relationship between humans and the environment. Continually pursuing anthropology's persistent claim that both the physical and the mental world matter, these environmental scholars proceed from the holistic assumption that the physical world and human societies are always inextricably linked. As they incorporate diverse forms of knowledge, their work reaches beyond anthropology to bridge the sciences, social sciences, and the humanities, and to forge working relationships with non-academic communities and professionals. Theoretical issues such as the cultural dimensions of context, knowledge, and power are articulated alongside practical discussions of building partnerships, research methods, and ethics, and strategies for implementing policy. *New Directions in Environment and Anthropology* will be important for all scholars and non-academics interested in the relation between our species and its biotic and built environments. It is also designed for classroom use in and beyond anthropology, and students will be greatly assisted by suggested reading lists for their further exploration of general concepts and specific research. The New Environmentalism? Davide Torsello, 2016-03-03 Drawing on rich ethnographic work in both Eastern and Western Europe, *The New Environmentalism* presents a range of case studies to explore the impact of corruption in EU-funded structural development projects. With detailed analyses of the forms and contexts of environmentalism, the book reveals the manner in which corruption is generated by the planning and implementation procedures of the projects, demonstrating in each case that environmental movements emerge as by-products of these processes, using corruption as part of a discourse employed in support of their action against political, regional, and state institutions, as well as to communicate their goals to local citizens. Shedding light on the ways in which revelations about corruption are adopted as a means to fostering civic participation in environmental movements and influencing institutional trust, this book contributes to our understanding of the loss of legitimacy and trust in local and global political institutions.

Comparative in approach *The New Environmentalism* provides new insights into the emergence of strong civic movements at local and trans-local levels in resistance to citizens' sense of increasing alienation from political participation and decision-making. As such, it will be of interest to anthropologists, sociologists, and political scientists concerned with questions of legitimacy, corruption, and activism.

Environmental Anthropology Today Helen Kopnina, Eleanor Shoreman-Ouimet, 2011-08-05 This collection offers a wide-ranging consideration of the field which illustrates how environmental anthropology can increase our understanding and help find solutions to environmental problems.

Yucatan in an Era of Globalization Eric N. Baklanoff, Edward H. Moseley, 2008-03-18 This work describes the profound changes to Yucatán's society and economy following the 1982 debt crisis that prostrated Mexico's economy. The editors have assembled

contributions from seasoned Yucatecologists historians geographers cultural students and an economist to chart the accelerated change in Yucatán from a monocrop economy to a full beneficiary and victim of rampant globalization

Encyclopedia of Religion and Nature Bron Taylor, 2008-06-10 The Encyclopedia of Religion and Nature originally published in 2005 is a landmark work in the burgeoning field of religion and nature It covers a vast and interdisciplinary range of material from thinkers to religious traditions and beyond with clarity and style Widely praised by reviewers and the recipient of two reference work awards since its publication see www.religionandnature.com/ern this new more affordable version is a must have book for anyone interested in the manifold and fascinating links between religion and nature in all their many senses

The World System and the Earth System Alf Hornborg, Carole L Crumley, 2016-09-17 In this benchmark volume top scholars come together to present state of the art research and pursue a more rigorous framework for understanding and studying the linkages between social and ecological systems Contributors from a wide spectrum of disciplines including archaeology anthropology geography ecology palaeo science geology sociology and history present and assess both the evolution of our thinking and current state of the art theory and research Covering ancient through modern periods they discuss the complex ways in which human culture economy and demographics interact with ecology and climate change The World System and the Earth System is critical reading for all scholars and students working at the interface of nature and society Contributors Thomas Abel Björn Berglund Chris Chase Dunn Alfred Crosby Carole L Crumley John Dearing Bert de Vries Nina Eisenmenger Andre Gunder Frank Jonathan Friedman Stefan Giljum Thomas Hall Karin Holmgren Alf Hornborg Kristian Kristiansen Thomas Malm Daniel Mandell Betty Meggers George Modelski Emilio Moran Helena Berg Frank Oldfield Susan Stonich William Thompson Peter Turchin

Territories of Difference Arturo Escobar, 2008-11-26 Through analysis of the Colombian Pacific's geography peoples and environment Escobar questions the place assigned to epistemology politics and the economy in modernity arguing that hierarchical privilege can be subverted via activists entanglement

The Cultural Context of Biodiversity Conservation Petra Maass, 2008 How are biological diversity protected areas indigenous knowledge and religious worldviews related From an anthropological perspective this book provides an introduction into the complex subject of conservation policies that cannot be addressed without recognising the encompassing relationship between discursive political economic social and ecological facets By facing these interdependencies across global national and local dynamics it draws on an ethnographic case study among Maya Q'eqchi communities living in the margins of protected areas in Guatemala In documenting the cultural aspects of landscape the study explores the coherence of diverse expressions of indigenous knowledge It intends to remind of cultural values and beliefs closely tied to subsistence activities and ritual practices that define local perceptions of the natural environment The basic idea is to illustrate that there are different ways of knowing and reasoning seeing and endowing the world with meaning which include visible material and invisible interpretative understandings These tend to be underestimated issues in

international debates and may provide an alternative approach upon which conservation initiatives responsive to the needs of the humans involved should be based on *Handbook of Archaeological Theories* R. Alexander Bentley, Herbert D. G. Maschner, Christopher Chippindale, 2007-11-09 This handbook gathers original authoritative articles from leading archaeologists to compile the latest thinking about archaeological theory The authors provide a comprehensive picture of the theoretical foundations by which archaeologists contextualize and analyze their archaeological data Student readers will also gain a sense of the immense power that theory has for building interpretations of the past while recognizing the wonderful archaeological traditions that created it An extensive bibliography is included This volume is the single most important reference for current information on contemporary archaeological theories **Positive Ecology** Gerald Schmidt, 2018-01-17 Until recently there has been a widespread view that we must give up amenities of modern life in order to achieve environmental sustainability While newspapers and other popular media tend to focus on the negative aspects of environmental change this volume examines the alternative notion of positive ecology Initially gleaned from the orientation of positive psychology this argues that environmental science has been all too focused on analysing negative pathologies and forgetting to provide more positive analysis and activism for sustainability Bringing together a wide range of positive ecology orientated case studies for the first time the book discusses the wider contexts of how humanity is dependent on a functioning biodiverse ecosphere of which we are only one part It provides an original and previously undervalued approach to sustainability and suggests that work towards sustainability is not only a necessity for our children s future but necessary sensible and meaningful in the present *Human Ecodynamics in the North Atlantic* Ramona Harrison, Ruth A. Maher, 2014-10-08 In *Human Ecodynamics in the North Atlantic* A Collaborative Model of Humans and Nature through Space and Time Ramona Harrison and Ruth A. Maher have compiled a series of separate research projects conducted across the North Atlantic region that each contribute greatly to anthropological archaeology This book assembles a regional model through which the reader is presented with a vivid and detailed image of the climatic events and cultures which have occupied these seas and lands for roughly a 5000 year period It provides a model of adaptability resilience and sustainability that can be applied globally First visiting the Northern Isles of Scotland in the Orkney Islands the reader is taken through the archaeology from the Neolithic Period through World War II in the face of sea level rise and rapidly eroding coastlines The Shetland Islands then reveal a deep time study of one large scale Iron Age excavation On to the northern coasts of Norway where information about late medieval maritime peoples is explained Iceland explores human environment interaction and implications of climate change presented from the Viking Age through the Early Modern Era Rounding out the North Atlantic Region is Greenland which sheds light on the Norse in the late Viking Age and the Middle Ages [Introduction to Cultural Ecology](#) Mark Q. Sutton, E. N. Anderson, 2009-08-16 A newer edition of this book is available for ordering at the following web address <https://rowman.com> ISBN 9780759123298 *Introduction to Cultural Ecology* provides a comprehensive discussion of

the history and theoretical foundations of cultural ecology featuring nine case studies from around the world **Against the Grain** Bradley B. Walters, 2008-01-17 Against the Grain gathers scholars from across disciplines to explore the work of ecological anthropologist Andrew P. Vayda and the future of the study of human ecology **Integral Ecology** Sean Esbjörn-Hargens, Ph.D., Michael E. Zimmerman, Ph.D., 2011-03-08 Today there is a bewildering diversity of views on ecology and the natural environment With more than two hundred distinct and valuable perspectives on the natural world and with scientists, economists, ethicists, activists, philosophers, and others often taking completely different stances on the issues, how can we come to agreement to solve our toughest environmental problems In response to this pressing need, Integral Ecology unites valuable insights from multiple perspectives into a comprehensive theoretical framework, one that can be put to use right now The framework is based on Integral Theory as well as Ken Wilber's AQAL model and is the result of over a decade of research exploring the myriad perspectives on ecology available to us today and their respective methodologies Dozens of real-life applications and examples of this framework currently in use are examined, including three in-depth case studies: work with marine fisheries in Hawaii, strategies of eco-activists to protect Canada's Great Bear Rainforest, and a study of community development in El Salvador In addition, eighteen personal practices of transformation are provided for you to increase your own integral ecological awareness Integral Ecology provides the most sophisticated application and extension of Integral Theory available today and, as such, it serves as a template for any truly integral effort Integral Ecology Sean Esbjörn-Hargens, Michael E. Zimmerman, 2009 Dozens of real-life applications and examples of this framework currently in use are examined, including three in-depth case studies: work with marine fisheries in Hawaii, strategies of eco-activists to protect Canada's Great Bear Rainforest, and a study of community development in El Salvador In addition, eighteen personal practices of transformation are provided for you to increase your own integral ecological awareness Jacket Political Ecology of Tourism Mary Mostafanezhad, Roger Norum, Eric J. Shelton, Anna Thompson-Carr, 2016-01-08 Why has political ecology been assigned so little attention in tourism studies despite its broad and critical interrogation of environment and politics As the first full-length treatment of a political ecology of tourism, the collection addresses this lacuna and calls for the further establishment of this emerging interdisciplinary subfield Drawing on recent trends in geography, anthropology, and environmental and tourism studies, Political Ecology of Tourism: Communities, Power, and the Environment employs a political ecology approach to the analysis of tourism through three interrelated themes: Communities and Power, Conservation and Control, and Development and Conflict While geographically broad in scope, with chapters that span Central and South America to Africa and South Southeast and East Asia to Europe and Greenland, the collection illustrates how tourism-related environmental challenges are shared across prodigious geographical distances while also attending to the nuanced ways they materialize in local contexts and therefore demand the historically situated, place-based and multi-scalar approach of political ecology This collection advances our understanding of the role of political, economic, and environmental concerns in tourism

practice It offers readers a political ecology framework from which to address tourism related issues and themes such as development identity politics environmental subjectivities environmental degradation land and resources conflict and indigenous ecologies Finally the collection is bookended by a pair of essays from two of the most distinguished scholars working in the subfield Rosaleen Duffy foreword and James Igoe afterword This collection will be valuable reading for scholars and practitioners alike who share a critical interest in the intersection of tourism politics and the environment

GroundWork for Community-Based Conservation Diane Russell, Camilla Harshbarger, 2003-05-13 While ecological and biophysical sciences have dominated the theory and practice of conservation practitioners and researchers worldwide know that conservation initiatives have profound social impacts and consequences for local communities and cultures This concise and accessible book will give students and practitioners a solid introduction to important methods from ethnography and interviews to surveys and community mapping always attending to the imperatives of local control and community partnerships

Historical Archaeology Martin Hall, Stephen W. Silliman, 2009-02-09 This volume offers lively current debates and case studies in historical archaeology selected from around the world including North America Latin America Africa the Pacific and Europe Authored by 19 experts in the field Explores how historical archaeologists think about their work piecing together information from both material culture and documents in an attempt to understand the lives of the people and societies they study Engages with current theory in an accessible manner Truly global in its approach but avoids subsuming local experiences of people into global patterns Summarizes not only the current state of historical archaeology but also sets the course for the field in decades to come

Reimagining Political Ecology Aletta Biersack, James B. Greenberg, 2006-11-22 A collection of ethnographies grounded in second generation political ecology which focuses on the interchanges between nature and culture and the local and the global

An Introduction to Cultural Ecology Mark Q. Sutton, E. N. Anderson, 2020-08-26 This contemporary introduction to the principles and research base of cultural ecology is the ideal textbook for advanced undergraduate and beginning graduate courses that deal with the intersection of humans and the environment in traditional societies After introducing the basic principles of cultural anthropology environmental studies and human biological adaptations to the environment the book provides a thorough discussion of the history of and theoretical basis behind cultural ecology The bulk of the book outlines the broad economic strategies used by traditional cultures hunting gathering horticulture pastoralism and agriculture Fully explicated with cases illustrations and charts on topics as diverse as salmon ceremonies among Northwest Indians contemporary Maya agriculture and the sacred groves in southern China this book gives a global view of these strategies An important emphasis in this text is on the nature of contemporary ecological issues how peoples worldwide adapt to them and what the Western world can learn from their experiences A perfect text for courses in anthropology environmental studies and sociology
