New Directions In Psychological Anthropology:

New Directions in Psychological Anthropology Theodore Schwartz, Geoffrey M. White, Catherine A. Lutz, 1992 The field of psychological anthropology has changed a great deal since the 1940s and 1950s when it was often known as Culture and Personality Studies Rooted in psychoanalytic psychology its early practitioners sought to extend that psychology through the study of cross cultural variation in personality and child rearing practices Psychological anthropology has since developed in a number of new directions Tensions between individual experience and collective meanings remain as central to the field as they were fifty years ago but alongside fresh versions of the psychoanalytic approach other approaches to the study of cognition emotion the body and the very nature of subjectivity have been introduced And in the place of an earlier tendency to treat a culture as an undifferentiated whole psychological anthropology now recognizes the complex internal structure of cultures The contributors to this state of the art collection are all leading figures in contemporary psychological anthropology and they write about recent developments in the field Sections of the book discuss cognition developmental psychology biology psychiatry and psychoanalysis areas that have always been integral to psychological anthropology but which are now being transformed by new perspectives on the body meaning agency and communicative practice *New Directions in the Anthropology of Dreaming* Jeannette Mageo, Robin E. Sheriff, 2020-10-08 This book presents new directions in contemporary anthropological dream research surveying recent theorizations of dreaming that are developing both in and outside of anthropology It incorporates new findings in neuroscience and philosophy of mind while demonstrating that dreams emerge from and comment on sociohistorical and cultural contexts The chapters are written by prominent anthropologists working at the intersection of culture and consciousness who conduct ethnographic research in a variety of settings around the world and reflect how dreaming is investigated by a range of informants in ever more diverse sites As well as theorizing the dream in light of current anthropological and psychological research the volume accounts for local dream theories and how they are situated within distinct cultural ontologies It considers dreams as a resource for investigating and understanding cultural change dreaming as a mode of thinking through contesting altering consolidating or escaping from identity and the nature of dream mentation In proposing new theoretical approaches to dreaming the editors situate the topic within the recent call for an anthropology of the night and illustrate how dreams offer insight into current debates within anthropology s mainstream This up to date book defines a twenty first century approach to culture and the dream that will be relevant to scholars from anthropology as well as other disciplines such as religious studies the neurosciences and psychology *Handbook of Cultural Psychology, First Edition* Shinobu Kitayama, Dov Cohen, 2010-01-04 Bringing together leading authorities this definitive handbook provides a comprehensive review of the field of cultural psychology Major theoretical perspectives are explained and methodological issues and challenges are discussed The volume examines how topics fundamental to psychology identity and social relations the self cognition emotion and motivation and

Intimate Enemies Kimberly Theidon,2012-10-29 In the aftermath of a civil war former enemies are left living side by side and often the enemy is a son in law a godfather an old schoolmate or the community that lies just across the valley Though the internal conflict in Peru at the end of the twentieth century was incited and organized by insurgent Senderistas the violence and destruction were carried out not only by Peruvian armed forces but also by civilians In the wake of war any given Peruvian community may consist of ex Senderistas current sympathizers widows orphans army veterans a volatile social landscape These survivors though fully aware of the potential danger posed by their neighbors must nonetheless endeavor to live and labor alongside their intimate enemies Drawing on years of research with communities in the highlands of Ayacucho Kimberly Theidon explores how Peruvians are rebuilding both individual lives and collective existence following twenty years of armed conflict Intimate Enemies recounts the stories and dialogues of Peruvian peasants and Theidon s own experiences to encompass the broad and varied range of conciliatory practices customary law before and after the war the practice of *arrepentimiento* publicly confessing one s actions and requesting pardon from one s peers a differentiation between forgiveness and reconciliation and the importance of storytelling to make sense of the past and recreate moral order The micropolitics of reconciliation in these communities present an example of postwar coexistence that deeply complicates the way we understand transitional justice moral sensibilities and social life in the aftermath of war Any effort to understand postconflict reconstruction must be attuned to devastation as well as to human tenacity for life

Living at the Edge of Chaos Helene Shulman,

Helene Shulman integrates experiences of synchronicity altered states of consciousness trance ritual Buddhist meditation practice and creativity into a broad perspective on cross cultural psychology What emerges is a comprehensive way to understand psychological illness and healing as a perpetual work in progress near the edge of chaos where the seeds for new models of reality lie With mental illness as the focus she leads us on a fascinating interdisciplinary exploration linking such areas as cultural studies anthropology evolutionary science and new work in mathematics and computer science known as complexity theory to Jungian psychology A new paradigm for postmodern psychology emerges as the author presents a dynamic theoretical model containing rational and irrational aspects of individual and collective life The relevance of this work extends well beyond the field of psychology for the author is describing the life experience of each of us in our personal and cultural milieu The current states of our environmental political and economic realities are presented as an urgent challenge to enter consciously into individual and community restoration work Living at the edge of chaos for all its apparent destruction is nonetheless a source of spontaneity creativity and hope Tuula Haukioja Jungian analyst Toronto

Explorations in Psychoanalytic Ethnography Jadran Mimica, 2007-05 Whereas most anthropological research is grounded in social cultural and biological analysis of the human condition this volume opens up a different approach its concerns are the psychic depths of human cultural life worlds as explored through psycho analytic practice and or the psychoanalytically framed ethnographic project In fact some contributors here argue that the anthropological interpretation of human existence is not sustainable without psychoanalysis others take a less extreme radical stance but still maintain that the unconscious matrix of the human psyche and of the intersubjective social reality of any given cultural life world is a vital domain of anthropological and sociological inquiry and understanding *Self and Identity* Richard D. Ashmore, Lee Jussim, 1997-05-15 Self and identity have been important yet volatile notions in psychology since its formative years as a scientific discipline Recently psychologists and other social scientists have begun to develop and refine the conceptual and empirical tools for studying the complex nature of self This volume presents a critical analysis of fundamental issues in the scientific study of self and identity These chapters go much farther than merely taking stock of recent scientific progress World class social scientists from psychology sociology and anthropology present new and contrasting perspectives on these fundamental issues Topics include the personal versus social nature of self and identity multiplicity of selves versus unity of identity and the societal cultural and historical formation and expression of selves These creative contributions provide new insights into the major issues involved in understanding self and identity As the first volume in the Rutgers Series on Self and Social Identity the book sets the stage for a productive second century of scientific analysis and heightened understanding of self and identity Scholars and advanced students in the social sciences will find this highly informative and provocative reading Dr Richard D Ashmore is a professor and Dr Lee Jussim is an associate professor in the Department of Psychology at Rutgers University New Brunswick New Jersey **The Routledge Companion to Contemporary Anthropology** Simon

Coleman, Susan B. Hyatt, Ann Kingsolver, 2016-11-25 *The Routledge Companion to Contemporary Anthropology* is an invaluable guide and major reference source for students and scholars alike introducing its readers to key contemporary perspectives and approaches within the field. Written by an experienced international team of contributors with an interdisciplinary range of essays, this collection provides a powerful overview of the transformations currently affecting anthropology. The volume both addresses the concerns of the discipline and comments on its construction through texts, classroom interactions, engagements with various publics, and changing relations with other academic subjects. Persuasively demonstrating that a number of key contemporary issues can be usefully analyzed through an anthropological lens, the contributors cover important topics such as globalization, law and politics, collaborative archaeology, economics, religion, citizenship, and community health and the environment. *The Routledge Companion to Contemporary Anthropology* is a fascinating examination of this lively and constantly evolving discipline. **Introduction to Vygotsky** Harry

Daniels, 2017-04-26 This thoroughly updated third edition provides students with an accessible overview of Vygotsky's work, combining reprints of key journal and text articles with rich editorial commentary. Lev Vygotsky provided the twentieth century with an enticing mix of intellectual traditions within an attempt to provide an account of the social formation of the mind. His legacy is an exciting but at times challenging fusion of ideas. Retaining a multi-disciplinary theme, *Introduction to Vygotsky* 3rd edition begins with a review of current interpretations of Vygotsky's original work. Harry Daniels goes on to consider the development of Vygotsky's work against a backdrop of political turmoil in the developing USSR. Major elements explored within the volume include the use of the culture concept in social development theory, the development of means of describing social life, the concept of mediation, and implications for teaching, learning, and assessment. This book will be essential reading for Vygotskian students in developmental psychology, education, and social sciences, as well as to students on specialised courses on cultural, cross-cultural, and socio-cultural psychology, philosophical psychology, philosophy of science, history of psychology, and Soviet Russian history. *Clifford Geertz by His Colleagues* Richard A. Shweder, Byron

Good, 2005-03-15 Clifford Geertz is the most influential American anthropologist of the past four decades. His writings have defined and given character to the intellectual agenda of a meaning-centered, nonreductive, interpretive social science and have provoked much excitement and debate about the nature of human understanding. As part of the American Anthropological Association's centennial celebration, the executive board sponsored a presidential session honoring Geertz. *Clifford Geertz by His Colleagues* compiles the twelve speeches given then by a distinguished panel of social scientists, along with a concluding piece by Geertz in which he responds to each speaker and reflects on his own career. These edited speeches cover a broad range of topics, including Geertz's views on morality, cultural critique, interpretivism, time and change, Islam, and violence. A fitting tribute to one of the great thinkers of our age, this collection will be enjoyed by anthropologists as well as students of psychology, history, and philosophy. **Latah in South-East Asia** Robert L. Winzeler, 1995-01-12 A

critical reassessment of latak the Malayan hyperstartle pattern and culture bound syndrome **Suicide as a Dramatic Performance** David Lester, Steven Stack, 2015-09-30 Each suicide is as unique as the individuals involved especially if one examines the nature of the act and to what extent these acts can be viewed as a theatrical performance Focusing on the dramatic aspects of suicide may seem tangential to the physical and mental pain experienced by those who try to kill themselves but dramatic aspects often provide important clues for understanding the mental state of suicidal individuals David Lester and Steven Stack investigate what happens in the weeks days and hours before a suicide when the suicidal individual must make decisions and formulate the script for his or her suicidal act The editors argue that these choices may help us understand and prevent other suicides and stimulate new and innovative research in this important area Through twenty five substantive chapters including both quantitative and qualitative analyses this book offers insights into suicide as a dramatic act with chapters on the intended audience the suicide note the location and method chosen and cultural scripts including suicide by cop sati seppuku and duels The contributors to this volume argue that psychological social and cultural factors influence these choices and that the decisions made by the individual are important for understanding the mental state of the person choosing to die by suicide **A Cognitive Theory of Cultural Meaning** Claudia Strauss, Naomi

Quinn, 1997 Culture and meaning are central to anthropology but anthropologists do not agree on what they are Claudia Strauss and Naomi Quinn propose a new theory of cultural meaning one that gives priority to the way people s experiences are internalized Drawing on connectionist or neural network models as well as other psychological theories they argue that cultural meanings are not fixed or limited to static groups but neither are they constantly revised and contested Their approach is illustrated by original research on understandings of marriage and ideas of success in the United States

Language and Self-Transformation Peter G. Stromberg, 2008-06-26 Social scientists have long been fascinated by the Christian conversion a form of religious experience that believers say both strengthens their faith and changes their lives This study looks at the performance of conversion narratives and argues that the performance itself is central to the efficacy of the conversion Through detailed analysis of a number of conversion narratives Peter Stromberg shows how these narratives can be understood as a form of ritual in which believers invoke central emotional conflicts and then attempt to resolve these conflicts by reframing them in terms of the language of Evangelical Christianity Although the Christian conversion narrative is used as the primary example the approach in this book also illuminates other practices such as psychotherapy in which people deal with emotional conflict through language
