**A Most Masculine State** Madawi Al-Rasheed, 2013-03-15 Women in Saudi Arabia are often described as either victims of patriarchal religion and society or successful survivors of discrimination imposed on them by others Madawi Al Rasheed s new book goes beyond these conventional tropes to probe the historical political and religious forces that have across the years delayed and thwarted their emancipation The book demonstrates how under the patronage of the state and its religious nationalism women have become hostage to contradictory political projects that on the one hand demand female piety and on the other hand encourage modernity Drawing on state documents media sources and interviews with women from across Saudi society the book examines the intersection between gender religion and politics to explain these contradictions and to show that despite these restraints vibrant debates on the question of women are opening up as the struggle for recognition and equality finally gets under way

**The Gender Imperative** Betty A. Reardon, Asha Hans, 2012-12-06 The book asserts that human security derives from the experience and expectation of human well being which depends on four essential conditions a life sustaining environment the meeting of essential physical needs respect for the identity and dignity of persons and groups protection from avoidable harm and expectations of remedy from them The book demonstrates their integral relationship to human security Patriarchy being the germinal paradigm from which most major human institutions such as the state the economy organised religions and social relations have evolved the book argues that fundamental inequalities must be challenged for the sake of equality and security The fundamental point raised is that expectation of human well being is a continuing cause of armed conflict which constitutes a threat to peace and survival of all humanity and human security cannot exist within a militarised security system The editors of the book bring together 14 essays which critically examine militarised security in order to find human security pathways show ways in which to refute the dominant paradigm indicate a clear gender analysis that challenges the current system and suggests alternatives to militarised security With a mix of

female and male feminist scholar activists as contributors the book makes an important contribution to a new discourse on human security **International Relations Scholarship Around the World** Arlene B. Tickner, Ole Wæver, 2009-06-24
