Workplace and Organizational Learning Bente Elkjaer,Maja Marie Lotz,Niels Christian Mossfeldt Nickelsen,2022-01-01

The central assumption that guides this book is that research and practice about learning at the workplace has recently lost its critical edge This book explores what has happened to workplace learning and organizational learning and studies what has replaced it In addition the book discusses to what extent there are reasons to revitalize it Today themes such as innovation co creation and knowledge sharing seem to have become preferred and referred to as theoretical fields as well as fields of practice In several chapters of this book it is argued that the critical power of learning could be regained by starting a new discussion of how these new fields of practice can be substantiated by topics such as learning arrangements learning mechanisms and learning strategies Hence the aim of this book is to both advance and recapture our knowledge of learning in today s increasingly complex world of work and organizing The contributions in this work do so by revisiting classic research on workplace and organizational learning and discussing how insights from this body of literature evokes new meaning It sets the stage for new agendas and rethinks current practices that are entangled in activities such as innovation co creation knowledge sharing or other currently widespread fields of practice Economy, Work, and Education Catherine

Casey,2016-07-27 Economy Work and Education Critical Connections addresses effects of neoliberal capitalism in particular regard to work and education It reveals limits and paradoxes in macroeconomic policy imperatives toward knowledge based economies and learning societies and elaborates ensuing critical concerns and dilemmas It concludes with an exploration of innovative conceptions of social citizenship which may stimulate sources of a revitalization of work and education beyond singular economic imperatives **A decade of experience with the European Company** Jan Cremers (University of

Amsterdam),Michael Stollt (ETUI) ,Sigurt Vitols (ETUI),2013-11-04 This publication of the SEEurope Network provides a comprehensive overview of the legislation on the European company SE Societas Europaea and its history and development It assesses the overall significance and impact of the SE on the business sector and on worker involvement in Europe and provides an outlook for the future of the SE The publication also makes specific recommendations for policymakers regarding the future revision of the SE legislation specifically as well as European company law and corporate governance generally Key questions addressed in the book are How has the SE been implemented in practice How great has the uptake of the

European Company by the business community been Are there significant differences between countries and sectors What impact has the European Company had on business practice Has it improved company mobility and flexibility What impact has it had on national industrial relations systems and Social Europe To what extent has it inspired other legislative initiatives by the EU Commission What will the likely future development of the European Company be

Towards a European Labour Identity Michael Whittall, Herman Knudsen, Fred Huijgen, 2007-05-07 Since 1996 a growing number of European employees have access to a European works council EWC a transnational employee body designed to complement national forms of labour representation This volume brings together a hep hive of contributors who present valuable new insights into how employee representatives from different European countries perform their jobs as members of European Works Councils in an attempt to develop some sense of a common European labour identity The transnational character of the EWC makes it an ideal microscopic structure through which the wider discourse surrounding identity especially when associated with globalization Europeanization and mobility can occur Towards a European Labour Identity examines not only the workings of the EWCs utilising individual case studies but also analyses and asses the link with the broader discussions on European identity as well as European trade union co ordination and solidarity

Learning Regional Innovation Marianne Ekman, Björn Gustavsen, Björn Terje Asheim, Öyvind Pålshaugen, 2010-12-08 Participation and social responsibility in innovation is the core theme of this book Both are issues of organization and not of ethics or the enforcement of other forms of obligations on individual actors The need is for a democratization of innovation that can make innovation open to broad participation

Governing the Firm in the Social Interest Catherine Casey, 2024-02-20 The corporate business enterprise is a core institution of capitalism It holds immense political economic and cultural power in society It mobilizes social and planetary

resources to its utility in pursuit of private profit maximization and with little regard for social concerns Its influence over so much of societal life and effects on the natural environment raise critical questions about the firm and its governance in democratic society Various voices seek reforms of regulation and corporate governance practices to those shaped by the neoliberal policies persisting in the current decades But prospects for amelioration within our current horizons of thinking appear elusive This book contributes a distinctly social theoretical approach to the social problem of governing the firm Its discussions complement debates in economics politics and law Its critical social theorizations challenge conventional understandings of the firm and neoliberal legitimacies of its governance and posit alternatives The book explores the social relations and moral fabric of the firm and the creativity of human action at work It proposes a reimagined corporate governance premised on just recognition of that social vitality It invites unprecedented collaboration for a robust participatory democracy for governing the firm and market action oriented to ecological and social sustainability

New Frontiers of Customer Strategy Thierry

Delecolle,Florence Jacob,Isabelle Prim-Allaz,2024-06-21 Digital transformation has shaped a new landscape for companies and their customers offering companies a wealth of data with which to develop customer knowledge However this evolution is just one of many transformations in customer marketing within an increasingly complex reality thrown into turmoil by environmental and social changes New frontiers in customer relations strategies are thus being drawn some in new territories grounded in efforts to preserve scarce resources while others are built on expectations of social responsibility These profound societal changes also reveal darker frontiers where companies have insufficient ethical considerations for vulnerable customers or merely react to changes in legislation New Frontiers of Customer Strategy offers practitioners lecturers and students an up to date reflection on the role of customer relations now and in the future to keep pace with environmental digital inclusive and ethical issues as well as organizational governance

Social Innovation, the Social

Economy and World Economic Development Denis Harrisson,Reynald Bourque,György Széll,2009 The world of work and

labour is in a permanent transformation affecting the various social groups in the different parts of the world quite unequally. Social innovations related to the idea of economic progress and well being tackle the problems of employment leading to social exclusion and poverty as a consequence of the extreme positioning in favour of economic performance. An alternative economy complements the deficiency of both the market and the State. This volume presents contributions from scholars coming from different continents about Social Economy, Labour Rights, corporate Social Responsibility, Social Regulations and Public Policies. Social innovations have huge impacts on national and regional economies as their sources come from the citizen. Many initiatives presented in this volume are a social response by civil society to poverty, precarious employment, job losses, long term unemployment, delocalisation and de industrialisation.

The New Frontier Guy Emerson, 1920 *The Future of Trade Unionism* Magnus Sverke, 2019-05-23

First published in 1997, this volume discusses the conditions for contemporary and future unionism in the light of recent economic, political and managerial changes. It presents theoretical and empirical research from Australia, Austria, Canada, Denmark, Italy, the Netherlands, New Zealand, Russia, South Africa, Sweden and the United States. Part 2 provides a rich international description of threats and challenges to contemporary and future unionism. Part 3 focuses on union strategical and structural change. Part 4 is concerned with the consequences of the changing union environment for member union relations. Magnus Sverke and the contributors here present research addressing how the changing environmental conditions affect unions and their members and demonstrate the importance of applying an international and multi disciplinary perspective on the analysis of these issues.
