Radiology For Mrcp:

Radiology for MRCP Sarah Howling, 2005 **Radiology for the MRCP** Graham Whitehouse, John Curtis, 1998-10-30

AI The MRCP is the membership exam for the Royal College of Physicians so it is essential that anyone wanting to practice hospital medicine passes it. It comes in two parts and radiology is covered in the second of these. Radiology covers the interpretation of all imaging modalities and techniques such as MRI and CT. Radiology for the MRCP is a self-assessment book for MRCP candidates comprising 180 questions each with 1 or 2 black and white images and detailed highly organized explanatory answers. The emphasis of the book is on clinical cases commonly featured in the MRCP examinations and on the new imaging modalities with which physicians need to be familiar but find gaining experience difficult. Answers are structured to reflect how answers should be presented to examiners in the various components of the MRCP Part 2 picture tests: short cases, long case, clinical Viva. Candidates can practise and assess their interpretation skills across a wide range of clinical conditions.

Radiology Cases for the MRCP Vincent Williamson, Debra King, 1999. MRCP candidates are required to have a basic knowledge of radiological interpretation as it applies to clinical practice. Radiology Cases for the MRCP comprises 90 typical clinical cases which may be part of the photographic section of the MRCP Part 2 examination or may require interpretation during a short or long clinical case. The answers include discussion points in the format of a clinical or oral examination and clinical symptoms and signs are included wherever appropriate.

Radiology for MRCP Sarah J. Howling, 2003. This updated edition of Radiology for MRCP includes 30 new cases, improved illustrations, new Magnetic Resonance Imaging, MRI, Computer Tomography, CT, and other new techniques to ensure close relevance to the exam. [Get Through MRCP Part 2](#)

Radiology for the MRCP Jeremy Hughes, Michael Hughes, Iain D. Lyburn, 2000. This new book will be invaluable in preparing for the difficult test of the Part 2 examination and in giving the physician confidence in interpreting a wide range of radiological imaging.

Get Through Radiology for MRCP Part 2 Gurmit Singh, Hugh Montgomery, 2007-09-28. For the MRCP Part 2 exam, candidates need to be able to interpret radiological images of commonly encountered conditions. They also increasingly need to be able to answer other questions about the condition shown in the image, for example treatment and prognosis. This book has been designed to meet that need. It is divided into five sections: chest, **Magnetic Resonance Cholangiopancreatography (MRCP)**, Riccardo Manfredi, Roberto Pozzi Mucelli, 2013-11-19. This book, based on the experience of a single large referral center, presents the characteristic findings obtained when using MR imaging and MR cholangiopancreatography (MRCP) to image the biliary tree and pancreatic ducts in a variety of disease settings. An introductory chapter is devoted to technical considerations, anatomy, and developmental anomalies. Subsequent chapters then present in detail the MR imaging and MRCP findings observed in choledocholithiasis, inflammatory and neoplastic disorders of the bile ducts, acute and chronic pancreatitis, according to etiology and different pancreatic neoplasms. Dynamic MRCP with secretin stimulation is also illustrated, documenting both

normal and abnormal responses of the pancreatic duct system to secretin Readers will find this book to be an excellent aid to the interpretation of MR imaging and MRCP findings in patients with biliary and pancreatic disease *Radiology of the Pancreas* Guy Delorme,Albert L.
