## **Rah For Engineers A Century Of Change:**

Rah for the Engineers! James P. McCormick,1986      **Army RD & A.** ,1995      Century Illustrated Monthly Magazine ...,1900      *Desert Edens* Philipp Lehmann,2024-12-17 How technological advances and colonial fears inspired utopian geoengineering projects during the late nineteenth and early twentieth centuries From the 1870s to the mid twentieth century European explorers climatologists colonial officials and planners were avidly interested in large scale projects that might actively alter the climate Uncovering this history *Desert Edens* looks at how arid environments and an increasing anxiety about climate in the colonial world shaped this upsurge in ideas about climate engineering From notions about the transformation of deserts into forests to Nazi plans to influence the climates of war torn areas Philipp Lehmann puts the early climate change debate in its environmental intellectual and political context and considers the ways this legacy reverberates in the present climate crisis Lehmann examines some of the most ambitious climate engineering projects to emerge in the late nineteenth and early twentieth centuries Confronted with the Sahara in the 1870s the French developed concepts for a flooding project that would lead to the creation of a man made Sahara Sea In the 1920s German architect Herman S rgel proposed damming the Mediterranean in order to geoengineer an Afro European continent called Atlantropa which would fit the needs of European settlers Nazi designs were formulated to counteract the desertification of Eastern Europe and Central Asia Despite ideological and technical differences these projects all incorporated and developed climate change theories and vocabulary They also combined expressions of an extreme environmental pessimism with a powerful technological optimism that continue to shape the contemporary moment Focusing on the intellectual roots intended effects and impact of early measures to modify the climate *Desert Edens* investigates how the technological imagination can be inspired by pressing fears about the environment and civilization      Engineering Trouble: US-Chinese Experiences of Professional Discontent, 1905-1945 Thorben Pelzer,2023-07-31 In the early twentieth century the first large batch of Chinese civil engineers had graduated from the USA and together with their American senior colleagues returned to China They were enthusiastic about reconstructing the young republic by building new railways highways and canals but what the engineers experienced in China including mismanaged railways useless highways and silted canals did not always meet their expectations and ideals In this book Thorben Pelzer makes the stories of these Chinese and American engineers come to life through exploring previously unpublished letters rare images maps and a rich biographical dataset He argues that the experiences of these engineers include a myriad of contradictions disillusionment and discontent keeping the engineering profession in a constant flux of searching for its meaning and its place in Republican China      **Uncommon Americans** Timothy Walch,2003-09-30 This first joint biography of the Hoovers will reshape Herbert Hoover s image as a man who did little more than sit in the White House while the country suffered Both Hoovers were dynamic uncommon Americans who made enormous contributions to mankind before during and after the presidency Walch Director of the Herbert Hoover

Presidential Library brings together contributions from leading scholars who have conducted extensive research into the lives of this extraordinary couple placing them in a national and international context He hopes to entice more historians to delve into the intricacies of their lives     The Century Illustrated Monthly Magazine Josiah Gilbert Holland,Richard Watson Gilder,1900     *Army RD & A Bulletin* ,1996     *American Engineer and Railroad Journal* ,1834     **Continual**

**Global Scientific Practice in an Age of Revolutions, 1750-1850** Patrick Manning,Daniel Rood,2016-09-27 The century from 1750 to 1850 was a period of dramatic transformations in world history fostering several types of revolutionary change beyond the political landscape Independence movements in Europe the Americas and other parts of the world were catalysts for radical economic social and cultural reform And it was during this age of revolutions an era of rapidly expanding scientific investigation that profound changes in scientific knowledge and practice also took place In this volume an esteemed group of international historians examines key elements of science in societies across Spanish America Europe West Africa India and Asia as they overlapped each other increasingly Chapters focus on the range of participants in eighteenth and nineteenth century science their concentrated effort in description and taxonomy and advances in techniques for sharing knowledge Together contributors highlight the role of scientific change and development in tightening global and imperial connections encouraging a deeper conversation among historians of science and world historians and shedding new light on a pivotal moment in history for both fields     **Nomadic Societies in the Middle East and North Africa** Dawn

Chatty,2018-11-12 A scholarly volume devoted to an understanding of contemporary nomadic and pastoral societies in the Middle East and North Africa This volume recognizes the variable mobile quality of the ways of life of these societies which persist in accommodating the nation state of the 20th and 21st century but remain firmly transnational and highly adaptive Composed of four sections around the theme of contestation it includes examinations of contested authority and power space and social transformation development and economic transformation and cultures and engendered spaces     *Dictionary of Architecture* Henry H. Saylor,1994-03-31 *Dictionary of Architecture* Place this useful little dictionary in your library if you want a handy source for the spelling pronunciation if unusual and concise definition of terms met in the study historical reading and practice of architecture Fashioned over a ten year period by one of America s leading architects the Dictionary can be used by architects students builders and building lovers from savant to sidewalk supervisor Verb adjective and adverb forms are usually omitted when the noun is listed to save space and reader time Only those technical terms from other fields that have a real bearing on architecture are included Illustrations are restricted to objects that are difficult or impossible to describe in words alone These are grouped in plates at the end of the dictionary Phonetic spelling is used for unusual words

rather than the shower of diacritical symbols which often discourages users of giant lexicons From abaciscus to zwinger the Dictionary of Architecture serves as a modest aid to those who would know the vocabulary of this mother of the arts

Congressional Record United States. Congress,1999      **Sheffield Steel and America** Geoffrey Tweedale,1987 The book provides an important contribution to the technological and commercial history of crucible and electric steelmaking by thoroughly examining its development in Sheffield and American centres such as Pittsburgh It also discusses cutlery saw and file manufacturing where the Americans quickly shed Sheffield s traditional technologies and with the help of superior marketing established a word lead by 1900 It is also shown however that this did not free the US from its dependence on Sheffield steel Sheffield s innovation in special steelmaking which began with the Hunstman crucible process in 1742 continued with a series of brilliant firsts which gave the world tool manganese silicon vanadium and stainless steel alloys Thus the US continued to draw from Sheffield know how even in the twentieth century a transfer of technology that was facilitated by the foundation of Sheffield s own subsidiary firms in America the history of which is recounted here
