Organization and Decision Theory Ira Horowitz, 2012-12-06 Ira Horowitz Depending upon one's perspective the need to choose among alternatives can be an unwelcome but unavoidable responsibility an exciting and challenging opportunity a run of the mill activity that one performs seemingly without thinking very much about it or perhaps something in between Your most recent selections from a restaurant menu from a set of jobs or job candidates or from a rent or buy or sell or lease option are cases in point Oftentimes we are involved in group decision processes such as the choice of a president wherein one group member's unwelcome responsibility is another's exciting opportunity Many of us that voted in the presidential elections of both 1956 and 1984 irrespective of political affiliation experienced both emotions others just pulled the lever or punched the card without thinking very much about it Arriving at either an individual or a

group decision can sometimes be a time consuming torturous and traumatic process that results in a long regretted choice that could have been reached right off the bat. On other occasions the just let's get it over with and get out of here solution to a long festering problem can yield rewards that are reaped for many years.

Theory and Practice in Policy Analysis

M. Granger Morgan, 2017-10-12. Many books instruct readers on how to use the tools of policy analysis. This book is different. Its primary focus is on helping readers to look critically at the strengths, limitations, and the underlying assumptions analysts make when they use standard tools or problem framings. Using examples, many of which involve issues in science and technology, the book exposes readers to some of the critical issues of professional responsibility, ethics, and values that are associated with policy analysis and research. Topics covered include policy problems formulated in terms of utility maximization such as benefit cost decision and multi attribute analysis; issues in the valuation of intangibles; uncertainty in policy analysis; selected topics in risk analysis and communication; limitations and alternatives to the paradigm of utility maximization; issues in behavioral decision theory related to organizations and multiple agents; and selected topics in policy advice and policy analysis for government.
