Choices and Illusions Eldon Taylor,2013 Explains the workings of the human mind and how its power can be used to change the world and realize full potential **Introduction to Paradigms** Manfred Stansfield,2001 *Introduction to Paradigms* is a generic look at the things that help to clear up the crippling reality paradigm confusion which we all are susceptible to just in growing up It demonstrates that A paradigm is a model of a portion of reality with fewer dimensions and a manageable size mass and energy Paradigms are necessary because they are the solution to the problem of having insufficient human RAM and CPU to be omniscient and deal with reality on a direct perception knowing basis The human solution is to create paradigms that do fit our RAM and CPU so we can change the undesirable elements of existence into

desirable ones Unfortunately paradigms can be more true or less true by accident or design and that's where the rub is Less true paradigms come about in two ways Through the incompetence of well meaning paradigm designers or By the deliberate introduction of bias into a paradigm to give inequitable power and money to some who have not earned it The bias is in the form of a lie in a paradigm or the miss definition of a word More money is made today by theft through paradigm bias than by the honest creation of wealth It is not a victimless crime The individual members of society as well as the society as a whole lose in wealth a lowered pursuit of happiness and a lowered survival potential Paradigm bias is a societal parasite and too many parasites kill the host Purveyors of paradigm bias are the same as confidence men One trick they use is to convince you that what they are telling you is reality when it is a paradigm Reality one tends to accept as true while one questions what is known to be a paradigm How do you tell the difference and what if you don't Example My telling you about a tree gives you my paradigm of a tree which can be more true or less true On the other hand the only way you get the reality of a tree is by seeing it for yourself climbing it feeling the trunk bark and leaves eating the fruit chewing on a leaf twig bark smelling the blossoms cones leaves bark and roots listening to the wind pass through the branches and leaves standing under the tree when the sun is too hot or when it is raining Example The 9/11 suicide pilots believed that what they had been told since early childhood was reality That they would go to a paradise which was a much nicer place than this world and that they would live forever with seven virgins and seven wives if they died committing a mass murder as they were told They did what they were told because they did not know the difference between paradigm and reality Reality is what you experience yourself Paradigms are anything you received through a communication paradigm such as what some one told you or you read We are all handicapped to the extent we are victims of the paradigm reality confusion and prone to be taken advantage of through paradigm bias More true paradigms require a paradigm designer well acquainted with reality Is science the answer Unfortunately the scientific method applies only to explicate order phenomena that can be repeated and verified by the lowest common denominator of scientist Science is still in denial of implicate order phenomena known for many centuries Only a small fraction of the paradigms we need to function on a personal and societal level can be scientifically demonstrated Peer review is another shortcoming and abuse The scientific method assumes that those doing the peer review are selfless high minded scientists experts in the same domain who judge according to their knowledge in the pursuit of truth for the good of mankind Actually many peers are egocentric and lie to ensure their careers Example Tobacco scientists disagree with conclusive studies linking smoking *The Skeptical Inquirer*, 2000 Anomalistic Psychology Christopher C. French, Anna Stone, 2017-09-16 The science behind claims of alien encounters and visions of ghosts can be even more fascinating than the sensationalist headlines What leads some people to believe in the paranormal Why might someone think they have been abducted by aliens And is there any room for superstition in the modern world of science Anomalistic Psychology Provides a lively and thought provoking introduction to the psychology underlying paranormal belief and experience Covers the latest

psychological theories and experiments and examines the science at the heart of the subject Uses a unique approach to apply different psychological perspectives including clinical developmental and cognitive approaches to shed new light on the key debates Whether you are a psychology student or simply curious about the paranormal Anomalistic Psychology is the essential introduction to this contested and controversial field Belief in the paranormal has been reported in every known society since the dawn of time find out why Extraordinary Knowledge K.
