This engaging study of progressive youth organizations charts their origins their quest to fashion an America true to its ideals and their demise Phillip Deery Victoria University Melbourne During the Great Depression young radicals in New York developed a vision of and for America molded by their understanding of the Great War and global economic collapse as well as other events unfolding both at home and abroad They worked to make their vision of a free equal democratic society based on peaceful coexistence a reality Their attempts were ultimately unsuccessful but their voices were heard on a number of issues including free speech racial justice and peace A major contribution to the historiography of the era *Fighting Authoritarianism* provides an important new examination of US youth activism of the 1930s including the limits of the New Deal and how youth activists pushed FDR Eleanor Roosevelt and other New Dealers to do more to address economic distress and social inequality and promote more inclusionary politics Britt Haas questions the interventionist versus isolationist paradigm and also explores the era not as a precursor to WWII but as a moment of hope about institutionalizing progress in freedom equality and democracy *Fighting Authoritarianism* corrects misconceptions about these activists vision heavily influenced by the American Dream they d been brought up to revere For them that meant embracing radical ideologies especially the socialism and communism widely discussed debated and promoted on the city s college campuses They didn t believe they were turning their backs on American values instead they thought such ideologies were the only way to make America live up to its promises This study also outlines the careers of Molly Yard Joseph Lash and James Wechsler how they retracted and for Yard and Lash reclaimed their radical past and how New York continued to hold a prominent platform in their careers Lash and Wechsler worked for the New York Post the latter as editor until 1980 Examining the decade from this perspective highlights the promise of America as young people understood it a historic moment when anything seemed possible

Is higher education a right or a privilege Who should go to college What should they study there These questions were hotly debated between the world wars when an unprecedented boom in college enrollments forced Americans to struggle between their belief in the importance of educational opportunity and their desire to preserve the existing social structure In *The American College and the Culture of Aspiration* 1915 1940 David O Levine offers the first in depth history of higher education during this era a period when colleges and universities

became arbiters of social and economic mobility and a hierarchy of schools evolved to meet growing demands for occupational training and socialization Congressional Record United States. When the Old Left Was Young Robert Cohen,1993-04-29 The Depression era saw the first mass student movement in American history The crusade led in large part by young Communists was both an anti war campaign and a movement championing a broader and more egalitarian vision of the welfare state than that of the New Dealers The movement arose from a massive political awakening on campus caused by the economic crisis of the 1930s the escalating international tensions and threat of world war wrought by fascism At its peak in the late 1930s the movement mobilized at least a half million collegians in annual strikes against war Never before and not again until the 1960s were so many undergraduates mobilized for political protest in the United States The movement lost nearly all its momentum in 1939 when the signing of the Hitler Stalin pact served to discredit the student Communist leaders Adding to the emerging portrait of political life in the 1930s this book is the result of an extraordinary amount of research has fascinating individual stories to tell and offers the first comprehensive history of this student insurgency
