Sap On Windows Nt:

SAP on Windows NT Stefan Huth, Robert Kolbinger, Hanns-Martin Meyer, 1999 Windows NT has now succeeded in establishing itself as a platform for SAP R/3. Initial doubts about the suitability of Windows NT as an operating system for a mission critical application have been eliminated by a considerable number of productive installations. Therefore the issue of choosing a platform for SAP R/3, one of the UNIX variations, Windows NT or OS/400 is much simpler now than in the pioneering days of two years ago. This book is a sort of R/3 NT compendium. It deals with all relevant matters concerning the question of whether and within which limits Windows NT is suitable as a platform for R/3. In this way it also provides the reader with a first orientation for deciding on a specific R/3 platform. The book is based on the experience of the Competence Center for SAP R/3 under Windows NT, iXOS R/3NTC, as well as on information gathered by the authors from many committed experts working on the subject of R/3 under Windows NT, last but not least from SAP itself. Key features: o the positioning of the NT platform as a base for SAP R/3 o overview of available databases and processor platforms o introduction to the NT functionality relevant for operation of R/3 o Practice or Computerworld, 1994-08-29 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide.
