The Full-Time Faculty Handbook Virginia Bianco-Mathis, Neal Chalofsky, 1999 The Full Time Faculty Handbook is a guide to the life of a college professor Editors Virginia Bianco Mathis and Neal Chalofsky examine the major components of a life in the academy teaching advising publishing research and service Practical comprehensive and engaging this handy guide appeals to a broad audience across all academic disciplines from new professors to tenured faculty Themes that are introduced and woven throughout the book include The basics of academic life Key strategies for success Political realities vs the ideal Managing your career creating your own schedule roadmap and network Assessing where you are and what needs to be done Finding fueling and maintaining your passion The authors also address the latest trends in the field that are affecting time honored teaching traditions such as distance learning outcome assessment continuous learning and the evolving roles and responsibilities of full time faculty **Leadership for 21st Century Learning** Colin Latchem, Donald E. Hanna, 2013-11-05 The challenge of managing education effectively is formidable Written by two education managers this text explores the issues associated with good leadership in educational and training institutions It is based on their own work and on a series of detailed interviews with eminent leaders *Quality in Higher Education* Brent D. Ruben, 2018-04-24 The concept of quality in higher education is by no means a new one By one set of definitions or another colleges and universities throughout the world have always held the pursuit of excellence as their primary goal Why then has the quality approach developed and popularized in industry and how increasingly applied in health care and government receiving so much attention in higher education at this moment What does this perspective add to the approaches to excellence with which they

have long embraced These are the two primary questions that this book seeks to address Chapters and contributors include The New Productivity by Peter F Drucker World War n and the Quality Movement by J M Juran The Quality Approach to Higher Education Context of Concepts for Change by Brent Ruben The Big Questions in Higher Education Today by L Edwin Coate An American Approach to Quality by Marilyn R Zuckerman and Lewis J Hatala Quality hi Higher Education Critical Issues in Definition and Assessment by Brent Ruben and Ten Areas for Future Research in Total Quality Management by A Blanton Godfrey The volume is graced with an opening essay by Francis L Lawrence president of Rutgers University Higher education is in the public spotlight today due to the many challenges it now faces rising tuition costs frustration about a tight job market for graduates calls for increased faculty productivity concerns about political correctness and criticisms regarding the use of grant and research funds among others Quality in Higher Education is a particularly timely book that will greatly benefit educators university administrators students and sociologists and all those who are interested in higher education today

Higher Education Management and Policy ,2008 **Planning for Higher Education** ,1994 Collective Bargaining in Higher Education and the Professions ,1994 *Insearch of Trust* Anthony G. (Tony) Kinkel,1998 *Cultural Diversity, Educational Equity and the Transformation of Higher Education* Michael Benjamin,1996-07-11 Cultural diversity policy in higher education requires detailed knowledge of the groups in question guiding principles and insight into universities as complex ecological systems The integration of these elements becomes the basis for proposing a variety of changes whose enactment would transform the university as we now know it Across North America making a comfortable place for ethnic minority students in higher education has become a hot topic Known as cultural diversity or educational equity this trend will likely play an important role in higher education over at least the next decade especially in light of on going demographic changes that will see Whites lose their population majority The result has been a growing literature the thrust of which is that policy and programming must be based on respect for difference This value is necessary but not sufficient to adequate planning and implementation of diversity policy and by itself may give rise to practice that is as likely to be harmful as helpful This book highlights and explores three additional elements judged crucial to diversity policy First clearer understanding of major ethnic minority groups second first principles upon which diversity policy should be grounded and third insight into the university as a complex ecological system Out of the integration of these elements emerges proposals for a variety of policy and programmatic changes that give substance to cultural diversity policy In turn full realization of diversity policy would involve the transformation of higher education as we now know it and together with like policies in other areas help to create the pluralistic society of the 21st century An important professional tool for administrators and faculty in higher education

Innovative Approaches to Teaching Technical Communication Tracy Bridgeford,Karla Saari Kitalong,Dickie Selfe,2004 Programs in technical writing technical communication and or professional communication have recently grown in enrollment as the demand among employers for formally prepared technical writers

and editors has grown. In response, scholarly treatments of the subject and the teaching of technical writing are also burgeoning and the body of research and theory being published in this field is many times larger and more accessible than it was even a decade ago. Although many theoretical and disciplinary perspectives can potentially inform technical communication teaching, administration and curriculum development, the actual influences on the field's canonical texts have traditionally come from a rather limited range of disciplines. *Innovative Approaches to Teaching Technical Communication* brings together a wide range of scholars and teachers to expand the existing canon.

A Culture for Academic Excellence Jan E. Freed, Marie R. Klugman, Jonathon D. Fife, 1997. This report provides a comprehensive review of quality principles in higher education and proposes that when used holistically and systematically, the quality principles also known as total quality management and continuous quality improvement can create a culture for academic excellence. After an introduction, the first section explains the historical significance of the quality movement in relationship to business and industry. Next, the report defines quality as it relates to higher education institutions and then describes how the quality movement has evolved among postsecondary institutions. The components of an institutional culture are identified, ways to build a culture that supports the quality principles suggested, and each of the quality principles briefly explained. Stressed is the need for a change in thinking as a prerequisite to initiating the quality approach on a campus. The following eight sections present the eight principles or characteristics of effective organizations in detail: 1. vision, mission and outcomes driven; 2. systems dependent; 3. systematic individual development; 4. decisions based on fact; 5. delegation of decision making; 6. collaboration; 7. planning for change; and 8. creative and supportive leadership. The final section integrates lessons learned from practitioners committed to the quality principles.
