Terrestrial Vegetation of California, 3rd Edition Michael Barbour, Todd Keeler-Wolf, Allan A. Schoenherr, 2007-07-17
This completely new edition of *Terrestrial Vegetation of California* clearly documents the extraordinary complexity and richness of the plant communities and of the state and the forces that shape them. This volume is a storehouse of information of value to anyone concerned with meeting the challenge of understanding, managing or conserving these unique plant communities under the growing threats of climate change, biological invasions and development. Harold Mooney, Professor of Environmental Biology, Stanford University. The plants of California are under threat like never before. Traditional pressures of development and invasive species have been joined by a newly recognized threat: human caused climate change. It is essential that we thoroughly understand current plant community dynamics in order to have a hope of conserving them. This book represents an important, well timed advance in knowledge of the vegetation of this diverse state and is an essential resource for professionals, students and the general public alike. Brent Mishler, Director of the University and Jepson Herbaria, and Professor of Integrative Biology, University of California, Berkeley.

SME Mining Engineering Handbook, Third Edition Peter Darling, Society for Mining, Metallurgy, and Exploration (U.S.), 2011. This third edition of the *SME Mining Engineering Handbook* reaffirms its international reputation as the handbook of choice for today's practicing mining engineer. It distills the body of knowledge that characterizes mining engineering as a disciplinary field and has subsequently helped to inspire and inform generations of mining professionals. Virtually all of the information is original content representing the latest information from more than 250 internationally recognized mining industry experts. Within the handbook's 115 thought provoking chapters are current topics relevant to today's mining professional. Analyzing how the mining and minerals industry will develop over the medium and long term, why such changes are inevitable, what this will mean in terms of challenges and how they could be managed. Explaining the mechanics associated with the multifaceted world of mine and mineral economics from the decisions associated with how best to finance a single piece of high value equipment to the long term cash flow issues associated with mine planning at a mature operation. Describing the recent and ongoing technical initiatives and engineering developments in relation to robotics, automation, acid rock drainage, block caving, optimization or process dewatering methods. Examining in detail the methods and equipment available to achieve efficient, predictable and safe rock breaking, whether employing a tunnel boring machine for development work, mineral extraction using a mobile miner or cast blasting at a surface coal

operation Identifying the salient points that dictate which is the safest most efficient and most versatile extraction method to employ as well as describing in detail how each alternative is engineered Discussing the impacts that social and environmental issues have on mining from the pre exploration phase to end of mine issues and beyond and how to manage these two increasingly important factors to the benefit of both the mining companies and other stakeholders
