Metaphor II ,1990-01-01 Metaphor though not now the scholarly mania it once was remains a topic of great interest in many disciplines albeit with interesting shifts in emphasis Warren Shibles *Metaphor An Annotated Bibliography and History* Bloomington Ind 1971 recorded the initial interest Then *Metaphor A Bibliography of Post 1970 Publications* published by John Benjamins continued the record through the mania years up to 1985 when writings proliferated as metaphor was seen to be a fundamental category in human thought and language Five years later there is a need for a report on the newest thinking and tendencies in the field This need is fulfilled by *Metaphor II* which offers a comprehensive view of information which would otherwise remain scattered throughout a numbing plethora of resources including many sometimes hard to find publications from Eastern Europe *Metaphor II* systematically collects references of books articles and papers published between 1985 and May 1990 and includes for completeness corrections and additions to the earlier bibliographies Abstracts are given for many of the titles while four indices disciplines semantic fields metaphor theory and names multiply the number of access points to the information

The Moving Image David Suda,1989-01-13 Through a discussion of habit myth metaphor and logic the first section of this work is a criticism of method and the presuppositions underlying meaning The author then presents a phenomenological meditation on clocks as metaphors of time arguing that trees hourglasses mechanical clocks and digital watches are particular metaphors of time and that they reveal beliefs about the meaning of time Contents include Knowing What One Has Heard Knowing The Time and Digital Time as Myth

Once upon a time The Scientific Revolution of the 17th century was an innovative concept that inspired a stimulating narrative of how modern science came into the world Half a century later what we now know as the master narrative serves

rather as a strait jacket so often events and contexts just fail to fit in No attempt has been made so far to replace the master narrative H Floris Cohen now comes up with precisely such a replacement Key to his path breaking analysis cum narrative is a vision of the Scientific Revolution as made up of six distinct yet narrowly interconnected revolutionary transformations each of some twenty five to thirty years duration This vision enables him to explain how modern science could come about in Europe rather than in Greece China or the Islamic world It also enables him to explain how half way into the 17th century a vast crisis of legitimacy could arise and in the end be overcome **Southern Humanities Review** ,1982 Algorithmic Modernity Morgan G. Ames,Massimo Mazzotti,2023 Algorithmic Modernity brings together experts in the history of mathematics to create an informed history for readers interested in the social and cultural implications of today s pervasive digital algorithm The Art of Czech Animation Adam Whybray,2020-06-25 The Art of Czech Animation is the first comprehensive English language account of Czech animation from the 1920s to the present covering both 2D animation forms and CGI with a focus upon the stop motion films of Jir Trnka Herm na T rlov Jan vankmajer and Jir Barta Stop motion is a highly embodied form of animation and The Art of Czech Animation develops a new materialist approach to studying these films Instead of imposing top down Film Theory onto its case studies the book s analysis is built up from close readings of the films themselves with particular attention given to their non human objects In a time of environmental crisis the unique way Czech animated films use allegory to de centre the human world and give a voice to non human aspects of the natural world points us towards a means by which culture can increase ecological awareness in viewers Such a refutation of a human centred view of the world was contrary to communist orthodoxy and it remains so under late stage consumer capitalism As such these films do not only offer beautiful examples of allegory but stand as models of political dissent The Art of Czech Animation is a unique endeavour of film philosophy to provide a materialist appraisal of a heretofore neglected strand of Central Eastern European cinema *The Historical Argument for the Resurrection of Jesus During the Deist Controversy* William L. Craig,2024-02-22 This volume provides the historical background to its companion volume Assessing the New Testament Evidence for the Historicity of the Resurrection of Jesus It traces the history of historical apologetics for Jesus resurrection from the first century through the twentieth century focusing on its apogee during the Deist controversy in Europe It explores which of the traditional arguments on behalf of the historicity of Jesus resurrection are obsolete and which still merit consideration today It includes a discussion of the problem of miracles both their possibility and identification which forms the backdrop for any contemporary case for the resurrection Scientific American ,1862 **Scientific American** ,1862-07
