

IV. THE PHILIPPINE SCIENCE AND TECHNOLOGY AGENDA AND DEVELOPMENT PROGRAMS

PHILIPPINE GOVERNMENT SCIENCE AND TECHNOLOGY AGENDA

Science and technology in the Philippines describes scientific and technological progress made by the Philippines and analyses related policy issues. The main agency responsible for managing science and technology (S&T) is the Department of Science and Technology (DOST). There are also sectorial councils for Forestry, Agriculture and Aquaculture, the Metal Industry, Nuclear Research, Food and Nutrition, Health, Meteorology, Volcanology and Seismology.

Science and technology plays an integral part in human development and the society because it can put an end to ignorance, increased perception of a fact or a situation, and awaken ability to use all resources and creativity to improve the quality of life and sustainable environment. Significant breakthroughs can only be achieved through a strong science foundation. Various significant changes that happened in the society are brought about by science its technology. But what does really happen in the Philippine setting? Let us look at it very closely.

The **Harmonized National R&D Agenda (HNRDA) 2017-2022** was prepared by the Department of Science and Technology (DOST), in collaboration with the government and other concerned private agencies and institutions to make certain that all the S&T endeavors are directed toward the realization of economic and social benefits of mankind. The agenda is in line with **Ambisyon Natin 2040: Matatag, Maginhawa, at Panatag na Buhay para sa Lahat**, which has three pillars: **Malasakit** (enhancing the social fabric), **Pagbabago** (reducing inequality), and **Kaunlaran** (increasing potential growth).
