

Alcoholism

- Alcohol: most harmful drug within society
- Alcohol hugely affects the heart
- High consumption of alcohol – suppress the respiratory system and affects the cerebellum so you stop breathing
- Alcohol unit calculation = (volume of alcohol x percentage of alcohol) / 1000
- National Advisory Council on Binge Drinking: a pattern of drinking alcohol that brings blood alcohol concentration to 0.08gm% or above. For a typical adult, this pattern corresponds to consuming 5 or more drinks (male) or 4 or more drinks (female) in about 2 hours
- Takes an hour for the liver to metabolise one unit of alcohol
- 90 – 98% metabolised in liver

Prevalence

- 27% of adult (16+) males and 15% of adult females are hazardous drinkers or above
- 6% of adult males and 3% of adult females are “very heavy drinkers”
- In 2001, 21% of men and 9% of women reported “binge drinking” at least once in preceding week
- Average GP sees 364 hazardous/harmful drinkers per year; however most GP’s have only 7 patients registered for alcohol problems
- GPs may be missing as many as 98% of hazardous and harmful drinkers on their lists
- It has recently been estimated that alcohol-related harm costs England £20 billion each year

Alcohol Pharmacology

- High water solubility but low lipid solubility
- 10/20% absorbed through the stomach begins in less than one minute
- 90/80% absorbed in small intestine

Alcohol Pharmacokinetics: Absorption

- Rapidly absorbed primarily from duodenum
- Enters brain easily
- Rate of absorption is extremely variable
- Alcohol is measured through blood alcohol concentration
- Peak blood alcohol concentration (BAC) depends on:
 - Amount and alcohol concentration of beverage
 - Rate of drinking
 - Food consumption and composition
 - Metabolism rate
 - Gender differences in absorption
 - Men have naturally less fat than woman and have a lower BAC than woman

come Treatment and Rehabilitation Except for small portions of the treatment section which involve pharmacotherapy much of these last two volumes deals with the psychological aspects of alcoholism and still more with the social It is interesting to review the evolution of this new pattern over the past seven years a pattern which had it existed initially would have resulted if not in a different format at least in a different title Our initial selection of areas to be covered was influenced by our desire to present as hard data as possible in an attempt to lend a greater aura of scientific rigor to a field which was generally considered as soft When we completed our review of this material in volumes 1-3 we recognized that what we might have gained in rigor we had more than lost in completeness These volumes presented a picture of a biological disease syndrome for which the remedies and preventive measures were presumably also biological And yet most workers in the field readily accept the significant contributions of psychological and social factors to the pathogenesis and treatment of alcoholism

Maisto, 2013-06-29 With the recent increase in the scope of drug and alcohol problems has come an awareness of the need for solutions In this context federal support for research on drug problems increased tremendously during the last 10 to 15 years with the establishment of the National Institute on Drug Abuse NIDA and the National Institute on Alcohol Abuse and

Alcoholism NIAAA Funding from these and other sources has led to a substantial increase in the quantity and quality of published work related to substance abuse. As data accumulate, it is becoming more apparent that substance abuse problems are extremely complex and are influenced by a variety of biological, psychological, and environmental variables. Unfortunately, it has proved difficult to go beyond this conclusion to a description of how these multiple factors work together to influence the development of and recovery from drug and alcohol dependence. The purpose of this book is to try to meet that objective by including in one volume literature reviews and theoretical analyses from a wide variety of drug researchers. We chose the authors in an attempt to assure that each of the various levels of analysis appropriate to the substance abuse problems would be included. In each case, the author was asked to consider how the variables in his or her particular domain might contribute to the appearance of individual differences in both alcohol and drug problems.

This memoir of a high functioning professional's recovery from alcohol abuse combines fascinating facts with intriguing stories. John Bradshaw, New York Times bestselling author of *Healing the Shame that Binds You*, Part autobiography, part recovery tool, this book is Bert Pluymen's story of struggle and triumph over alcohol addiction. It also contains insightful, witty, uplifting, and wryly humorous stories of the many people Pluymen met who were also searching for sobriety. This is an informative book that will shed new light on how alcohol abuse can ruin people's lives even if they thought it could never happen to them. A vital tool for awakening the alcohol abusing professional.

Dr. Frank Sadlack, Ph.D., executive director of La Hacienda Treatment Center. Plain talk and personal experiences make Bert Pluymen's book a real guide for anyone whose life has been touched by addiction. The section on women and alcohol is especially good.
